# Change Record

REV.	Date	Summary of Changes	
		Item	Description
1.0	2025.08.18	-	First Edition.

## ■ Statement

This manual content may be altered without permission, and our company reserves the rights to make changes without notice in technology, spare parts, hardware and software of the products. If more information is needed about the products, please contact our company. Without any written permission from our company, any section of this manual is prohibited to be copied or transferred in any form.

## ■ Copyright

Printed in China

1.0 Version

## ■ Warnings

This must be complied with in order to avoid any damage to the human body and the equipment.

This is showing the important information and tips for the printer operation.

**Note:** Due to continuous update of our product, the description of printer specification, accessories, design in this manual may be slightly different. Please keep in kind prevail.

# Important Safety Instructions

Before using the appliance, please carefully read the following safety regulations in order to prevent any hazard or material damage.

## 1. Safety warning

Warnings: The print head will become very hot during printing. avoid contact with the print head after printing has finished.

Warnings: Do not touch the printer head and connector in case static damage the printer head.

## 2. Instructions

**Warnings: Violating following instructions can cause serious injury or death.**

1) Do not plug several products in one multiperture outlet.

- This can provoke over-heating and a fire.
- If the plug is wet or dirty, dry or wipe it before usage.
- If the plug does not fit perfectly with the outlet, do not plug in.
- Be sure to use only standardized multiperture outlet.

2) You must use the supplied adapter.

- It is dangerous to use other adapters.

3) Do not pull the cable to unplug.

- This can damage the cable, which is the origin of a fire or a breakdown of the printer.

4) Do not plug in or unplug with your wet hands.

- You can be electrocuted.

5) Do not bend the cable by force or leave it under any heavy object.

- A damaged cable can cause a fire.

**Note: Violating following instructions may cause slight damage of the appliance.**

- 1) If you observe a strange smoke, odour or noise from the printer, unplug it before taking following measures.
  - Switch off the printer and unplug the set from the mains.
  - After the disappearance of the smoke, call your dealer to repair it.
- 2) Install the printer on the stable surface.
  - If the printer falls, it can be broken and you can hurt yourself.
- 3) Use the approved accessories only and do not try to disassemble, repair or remodel it by yourself.
  - Call your dealer when you need these services.
  - Do not touch the blade of auto cutter.
- 4) Do not let water or other foreign objects drop into the printer.
  - If this happened, switch off and unplug the printer before calling your dealer.
- 5) Do not use the printer when it is out of order. This can cause a fire or an electrocution.
  - Switch off and unplug the printer before calling your dealer.
- 6) Other considerations:
  - Place the printer on a solid and even base so that it cannot fall.
  - Leave enough space around printer for operation and maintenance.
  - Keep all liquids away from the printer.
  - Do not expose the printer to high temperatures, direct sunlight or dust.
  - Ensure the printer is connected to a socket with the correct mains voltage.
  - Switch off the printer POWER supply when it's not in use for a long time.
  - To ensure the printing quality and reliability, suggest use the same quality or recommend paper supplier.
  - Pls. switch off the POWER supply when connect/disconnect all the ports or it will cause damage to the printer control circuit.
  - Never carry out maintenance or repair work yourself. Always contact a qualified service Technician.
  - Keep this User Manual in a place which is easily accessible for all times.

### 3. Other Precautions

The copyright for this user manual and various other manuals is property of our company. Any copying or conversion into electronic form and saving of this material without the express written permission is strictly prohibited. Use of the information contained in this manual is not subject to any patent liability. This manual has been prepared with utmost care and attention to detail but may contain certain errors and/or omissions. Our company is not legally liable for any damages resulting from the use of the information in this manual. Our company and its affiliates are not legally liable (United States excluded) for any damages, loss, costs, and/or expenses that result from the breakdown, malfunction, and/or misuse of the product due to violation or neglect of the operation and maintenance information and instructions provided by our company, as well as from the unauthorized alteration, repair, and/or modification of the product by the user and/or third party. We are not legally liable for any damages and/or issues resulting from the use of options and/or parts that are not authentic or authorized products.

### 4. WEEE (Waste Electrical and Electric Equipment)

This mark shown on the product or its literature indicates that the corresponding item should not be discarded at the end of its working life with others household waste. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate marked items from other types of waste and recycle them responsibly to promote the sustained reuse of material resources. Household users should contact either the retailer where they purchased this product, or their local government office for details of where and how they can conduct environmentally safe recycling of such items. Commercial users should contact their suppliers and check the terms and conditions of purchase contracts. This product should not be combined with other commercial waste for disposal.

## 5.FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the

user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.

### WARNING:

This Equipment is not suitable for use in locations where children are likely to be present.

The product needs to be reliably earthing after being powered on.

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Replacement of a battery with an incorrect type that can defeat a safeguard. Disposal of a battery into fire or a hot oven, or mechanically crushing or cutting a battery, can result in an explosion.

Leaving a battery in an extremely high temperature surrounding environment can result in an explosion or the leakage of flammable liquid or gas.

Note: This product is not used for children.

## Warning

This product contains a button battery.

If the button battery is swallowed, it can cause severe internal burns in just 2 hours and can lead to death.

Keep new and used batteries away from children.

If the battery compartment does not close securely, stop using the product and keep it away from children.

If you think batteries might have been swallowed or placed inside any part of the body, seek immediate medical attention.

Do not charge button batteries. Risk of fire or explosion if the battery is replaced by an incorrect type

The protective grounding conductor of the product shall be connected to the protective grounding conductor of the installation.

## Chapter 2 Specifications

Item		Parameter
<b>Model</b>		BP 4210i&BP 4308i
<b>Printing</b>	Printing Method	Direct thermal/ Transfer thermal
	Resolution	203dpi/300dpi
	Max. Printing Speed	203dpi:2~8ips,300dpi:6ips
	Max. Printing Width	104 mm
	Max. Printing Length	1000 mm (203dpi)/750 mm (300dpi)
<b>Programming Language</b>		DPL,EPL2,ZPL-II,TSPL
<b>Media</b>	Type	Folded paper or roll paper, die-cut or continuous label paper, black mark paper
	Width	20 mm - 118 mm
	Thickness	0.08 mm - 0.25 mm
	Roll Paper Diameter	200 mm
	Int. Diameter	1.5 inch (38.1 mm), 3 inch (76.2 mm)
<b>Ribbon</b>	Type	Wax, Resin, Mixes Base
	Inside Diameter	25.4 mm
	Width	30 mm – 110 mm
	Max length	450 meters
<b>Processor</b>		32-bit RISC CPU
<b>Memory</b>	RAM	128MB
	Flash	256MB
<b>Detection</b>	Sensor	Out-of-paper Sensor, Gap Sensor, Cover Opening Sensor, Black Mark Sensor, TPH Temperature Sensor, Ribbon Out Sensor
<b>Display</b>		2.4 inch display screen
		Clock
		Two-color light: status indicator, pause indicator, data indicator, media indicator, network indicator Control key: 4 + 4 (Menu, Calibration, Feed, Pause, Return key, Confirm key, Up / Down key)

Item		Parameter
Built-in fonts	Bitmap Font	6, 8, 12, 16, 32, OCR A&B. 90 °, 180 °, 270 ° rotation and 10x magnification in both horizontal and vertical directions
	Vector Font	Equal width CG Triumvirate™ Vector font
Downloadable fonts	Bitmap Font	90 °, 180 °, 270 ° rotatable, single text 90 °, 180 °, 270 ° rotatable
	Vector Font	90 °, 180 °, 270 ° rotatable
	Asian Characters	16x16, 24x24 Traditional Chinese, Simplified Chinese, Japanese, Korean
One-dimensional Code		Code 39, Code 93, EAN 8/13 (add on 2 & 5), UPC A/E (add on 2 & 5), I 2 of 5 & I 2 of 5 with Shipping Bearer Bars, Codabar, Code 128 (subset A, B, C), EAN 128, RPS 128, UCC 128, UCC/EAN-128 K-Mart, Random Weight, Post NET, ITF 14, China Postal Code, HIBC, MSI, Plessey, Telepen, FIM, GS1 DataBar, German Post Code, Planet 11 & 13 digit, Japanese Postnet, I 2 of 5 with human readable check digit, Standard 2 of 5, Industrial 2 of 5, Logmars, Code 11, Code 49, Cadablock
QR code		PDF417, Data matrix code, Maxi Code, QR code, Micro PDF417, Micro QR code, Aztec code
Interface	Standard	USB, Serial port, Ethernet, USB Host
	Optional	Wi-Fi (EAP protocol)
Security Specification		CCC,FCC,CE,CB,UL,RoHS WEEE
Enviromental	Operation Temperature	41 °F (5°C) -104 °F (40°C), 30% -85%, non-condensing
	Storage Temperature	-4°F (-20°C)-122°F (50°C), 10%-90%, non-condensing
Relative Humidity		30% ~85%, non-condensing
Power Input		Input: AC 100-240 V, 50 / 60 Hz, Output: DC 24 V / 6 A
Optional		Electric cutter module (cutter, rotary blade) Label stripping module

## Chapter 3 Installation & Usage

### 3.1 Ribbon and Paper Loading

#### 3.1.1 Ribbon loading

1. Place the printer on the flat table, lift the cover from the bottom-right of printer by hands.

2. Load the out side ink ribbon into ribbon supply spindle, then anticlockwise tighten the ribbon latch to fix the ribbon.

3. Pull a part of ribbon of pass the ribbon between the print mechanism and the media sensor.

4. Pass the ribbon over the print mechanism and stick the ribbon on the take-up spindle, then wrap it several turns around the ribbon take-up spindle.

Ribbon Take-up Spindle

### 3.1.2 Media Loading

1. Lower the paper roll baffle, align the paper with the media spindle, and then lift the paper roll baffle.

2. Push the paper roll baffle inward until it engages the paper roll. Pull a part of ribbon, then pass the ribbon between the print mechanism and the media sensor.

3. Push the paper holder inward to adjust for the label width.

Roll Holder External Media Guide

4. When using the gap label, black mark label or punch hole label, you can manually adjust the media sensor by the adjusting level to find the gap, black mark or punch hole for the detecting print position.

Sensor Adjusting Level

5. After finishing the label loading, press the print head down to make ribbon and label fit snugly.

### 3.1.3 Media Path

#### 1. TEAR-OFF mode

#### 2. CUTTER mode

### 3. PEEL-OFF/REWIND mode

## 3.2 Power Connection

1. Connect the power plug to power receptacle.
2. Connect the other end of power cord to the AC power port.

### Caution:

- Use the original power adapter only. Avoid the damage caused by charging improperly.
- Please unplug the printer power cord if it is not in use for a long time.

## 3.3 Operation Panel

### 3.3.1 Panel Introduction

The panel indicates the printer's operating status and allows the user to control basic printer operation.

### 3.3.2 Button Function Definition

1. Menu button:

In standby, long press the menu operation function to enter the display.

2. Calibration button:

In standby, short press the Calibration button to activate the media calibration function.

3. Pause button:

- In Printing: short press to pause printing, long press to clear current print task.
- Printing Pause: short press to keep printing, long press to clear current print task.

4. Feed button:

- In the ready state, press the Feed button (*<1 seconds*), then release the feed button. The printer will make a blank paper positioning according to label / black mark label. If it is continuous paper, press the Feed button and the printer will continue to feed the paper. Release the paper feed button to stop printing immediately.
- In the ready state, press the Feed button (*approx. 1.5 seconds*) until the ready indicator is out for the first time. And the printer prints the self-test page.
- In the ready state, press the Feed button (approx. 3 seconds) until the ready indicator is out for the second time. And the printer starts gap mode label learning.
- In the ready state, press the Feed button (approx. 4.5 seconds) until the ready indicator is out for the third time. And the printer starts black mark mode label learning.
- In the ready state, press the Feed button (about 6 seconds) until the ready indicator is out for the third time. Release the Feed button, and the printer enters data dump mode.
- In the dump mode, press the Feed button, and the printer will print "Out of Dump Mode Now" and then return to the normal printing mode.

### 3.3.3 Buzzer

1. Silence: not set / normal
2. Beep 0.2 seconds: button response / touch response / close the mechanism
3. Beep 0.2 seconds, stop 0.2 seconds and beep 0.2 seconds: open the mechanism
3. Beep 0.5 seconds, stop 0.5 seconds, beep 0.5 seconds, stop 0.5 seconds and beep 0.5 seconds: during printing, run out of paper / label off / paper jam / cutter jam / run out of ribbon

### 3.3.4 Indicator Definition

STATUS	PAUSE	DATA	SUPPLIES	NETWORK	
					Printer is ready
					Printer is pause
					Media supply is out
					Ribbon is out
					Ribbon not required in Direct Thermal mode
					Printhead is open
					Printhead is over temperature
					Printhead is under temperature
					Unable to read the dpi setting
					Network connected
					Ethernet error found
					WLAN is Associating
					WLAN signal is weak

### 3.5 Display Operation Procedure

**Note:**

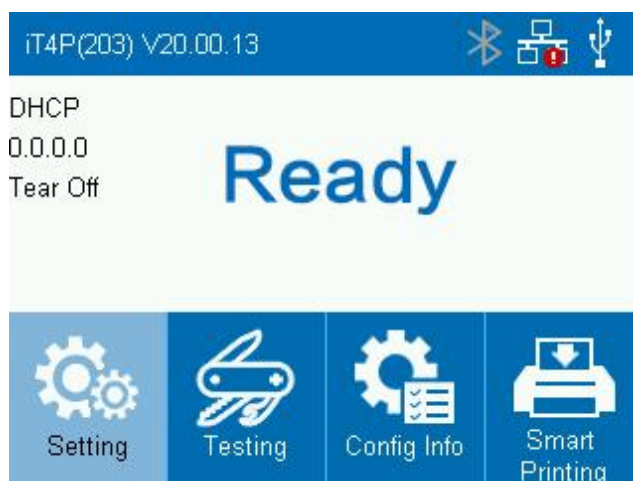

- The display operation of printer BP 4210i&BP 4308i is controlled by directional pad.
- The highlighted item represents that user has chosen the item needed.

In the following instructions, the example will be taken to show user how to operate the printer.

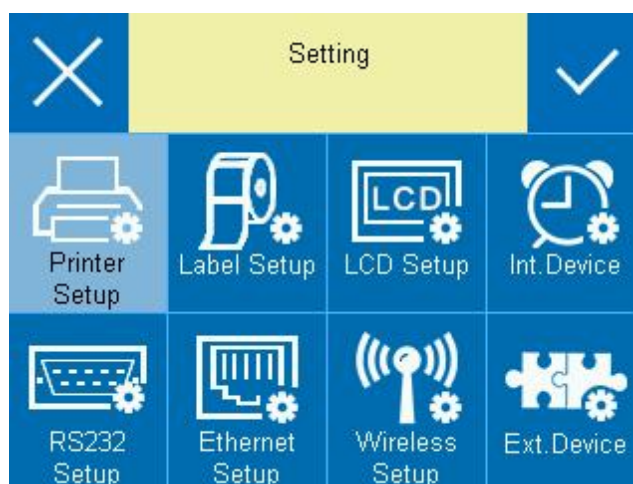

Changing the speed of the printer:

1.Press the power button to open the printer's power.

2.Press the menu button  to enter the home menu, then choose the "Setting" item.

3.Enter the setting menu, then choose the "Printer Setup" item.

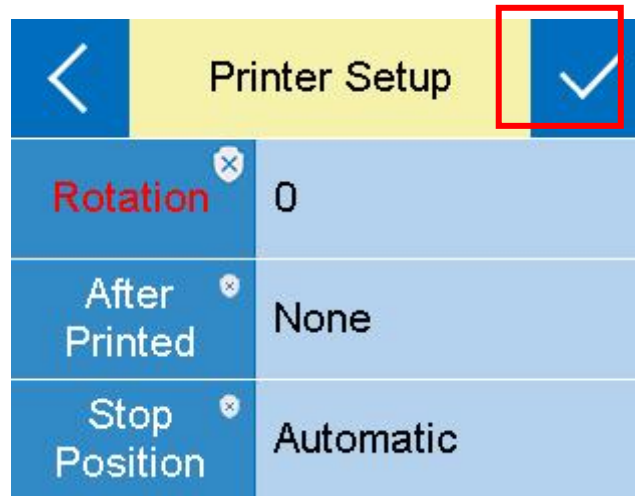

4.Enter the “Printer Setup” menu.

✕	Printer Setup		>
Print Method	<input checked="" type="radio"/> DT	<input type="radio"/> TT	
Print Speed	4 ips	+	
Print Darkness	10	+	

5.Move the selection highlight to “Print Speed” item by down arrow button. Then change it into the value needed by enter button.

✕	Printer Setup		>
Print Method	<input checked="" type="radio"/> DT	<input type="radio"/> TT	
Print Speed	6 ips	+	
Print Darkness	10	+	

6. Press the tick to save the values that have been changed.

Finishing the above operation, user has changed the speed of the printer successfully.

**Note:**

- Much more detailed information of display menu needed, please refer to the appendix in the end.
- Pictures above are for your reference, and the display shows as the real printer does.

## Chapter 5 Maintenance & Adjustment

Adhesives and coatings of the media can transfer to the printer parts over time along the media path including the thermal print head and media sensor. This build-up can accumulate dust and debris. Failure to clean the print head, media path, and media sensor could result in inadvertent loss of labels, label jams and possible damage to the printer.

**Note:**

- Make sure to turn off the printer prior to cleaning.
- As the print head gets hot during printing, if intending to clean the print head, turn the printer off and wait approximately 2~3 minute before commencement.
- When cleaning the print head, take care not to touch the heated portion of the print head. Print Head is susceptible to damage from static electricity, etc. It is strongly recommended to wear hand gloves during cleaning progress.
- Take care not to allow the print head become scratched and/or damaged in any way.

### 5.1 Cleaning Thermal Print Head

Thermal Paper stock on the print head, which degrades print quality. Clean the print head with methanol or isopropyl alcohol and a cotton bud. Do not touch the heating elements with your fingers.

- 1) Open the Printer Cover and then use the cleaning pen to clean the head in the direction from the center of the head to two sides.
- 2) After cleaning the head, do not use the printer until the alcohol used for cleaning evaporates completely (1~2 min) and the printer has completely dried.
- 3) Perform the cleaning process each time the paper roll is replaced to prevent print quality deterioration.

## 5.2 Cleaning Roller and/or Paper Path

- 1) Open the printer cover and then remove the paper.
- 2) Remove any dust or foreign substance using dry cloth or cotton swab.
- 3) Soak the cloth or cotton swab in alcohol for medical use and use it to remove adhesive foreign substances or other pollution materials.
- 4) After cleaning the parts, do not use the printer until the alcohol evaporates completely (1~2 min) and the printer has completely dried

**Note: Clean the parts when print's quality or label detection degrades.**

# Chapter 6 Printer Utility Tool Instructions

## 6.1 Installation Preparation

Download the printer utility tool. For example: BOXP PrinterUtility Vx.x.x.x.exe.

## 6.2 Usage

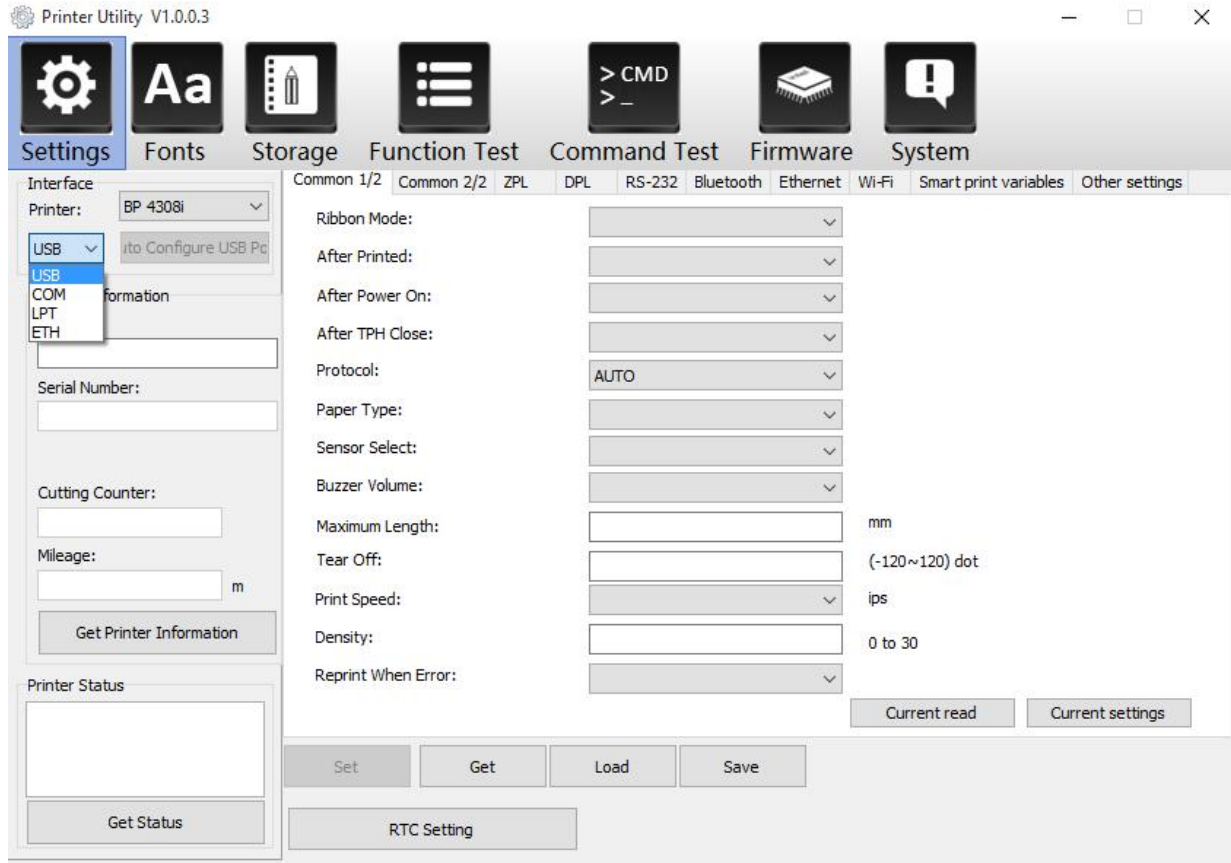

**Note:**

- Under different operating system, the screen has slight difference. The following example is based on the Windows 10 operating system.
- It is recommended to close the relevant security protection software before installation to avoid affecting the installation of the tool.

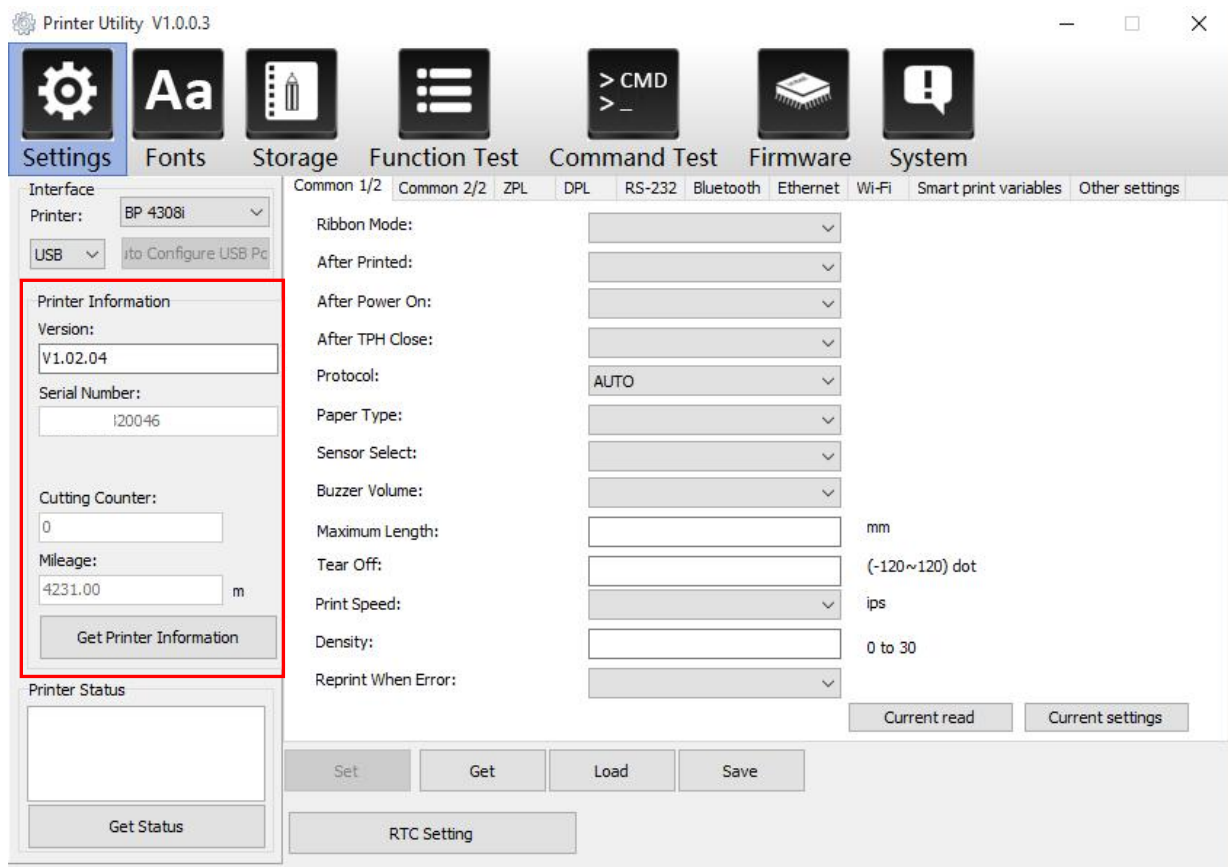

1. Open the printer utility tool.

2.Click “Settings”, choose the printer model.

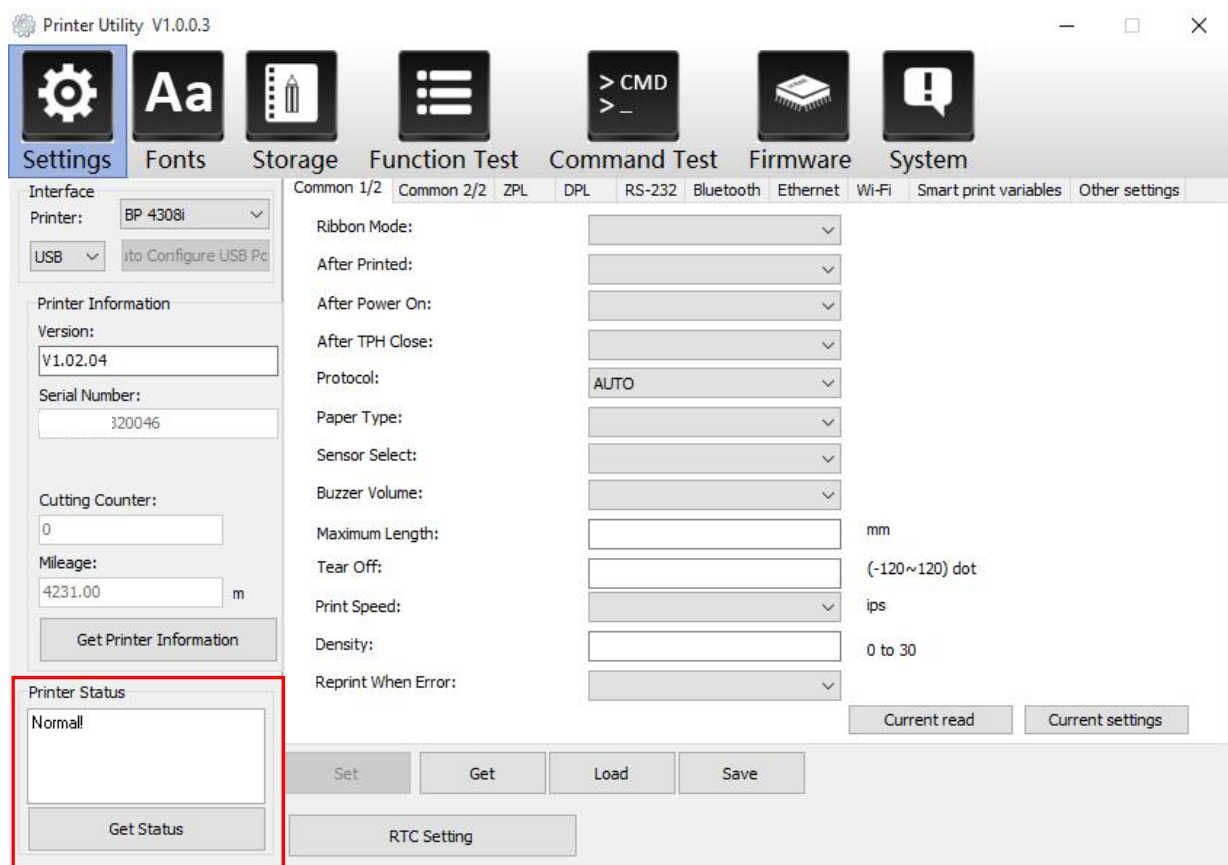

(1) Set up the interface needed. (range: USB, COM, LPT, ETH)

(2) Click “Get Printer Information”, and printer information will show in the above.

(3) Click “Get Status”, and printer status will show in the above.

(4) Choose “Common” and click “Get”. In this menu, user can get the information about the protocol, sensor, print speed, density and so on.

4. Click "Storage" to print image. (The file name can only be English or numeric.)

The screenshot shows a web interface titled "Download File". At the top, there are three dropdown menus: "File Type:" set to "Graphics", "Magnification:" set to "1.0", and "Protocol:" set to "TSPL". Below these is a "File Name:" text input field, followed by an ellipsis button (...) and a "Download" button. A status bar indicates "Free space: 95,107,072B; Uses space: 22,202,368B." The main area is divided into three columns: "Graphics", "Label Form", and "Auto Label Form". Each column contains a large empty rectangular box for image preview. Below each box is a vertical stack of four buttons: "List All [Category]", "Print Selected [Category]", "Delete Selected [Category]", and "Delete All [Category]". For the "Auto Label Form" column, the last button is labeled "Enable Auto Form".

(1) Click "File name" to select the image.

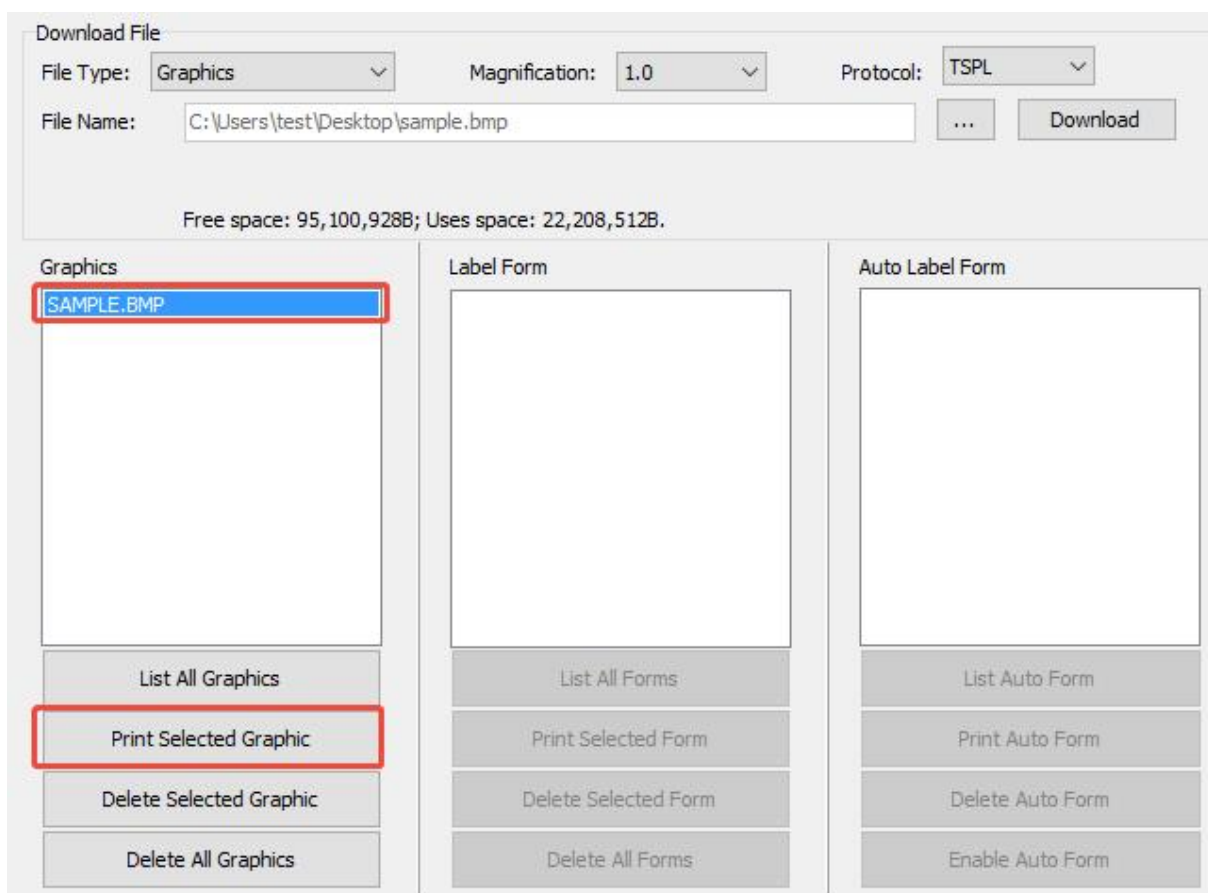

This is a close-up of the "Download File" interface. It shows the "File Type:" dropdown set to "Graphics", "Magnification:" set to "1.0", and "Protocol:" set to "TSPL". The "File Name:" text input field is empty. To the right of the input field is an ellipsis button (...), which is highlighted with a red rectangular box. To the right of the ellipsis button is a "Download" button.

▲Note: The file name must be in English or number, and the filename length must be less than 32.

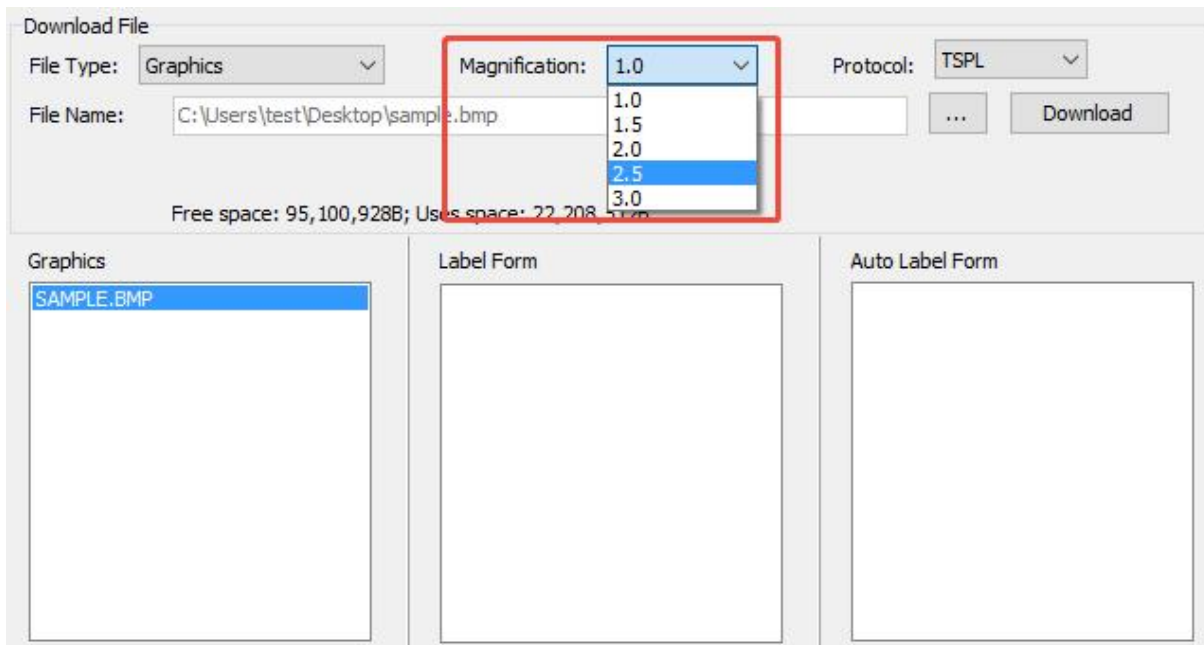

(2) Click “Download”.

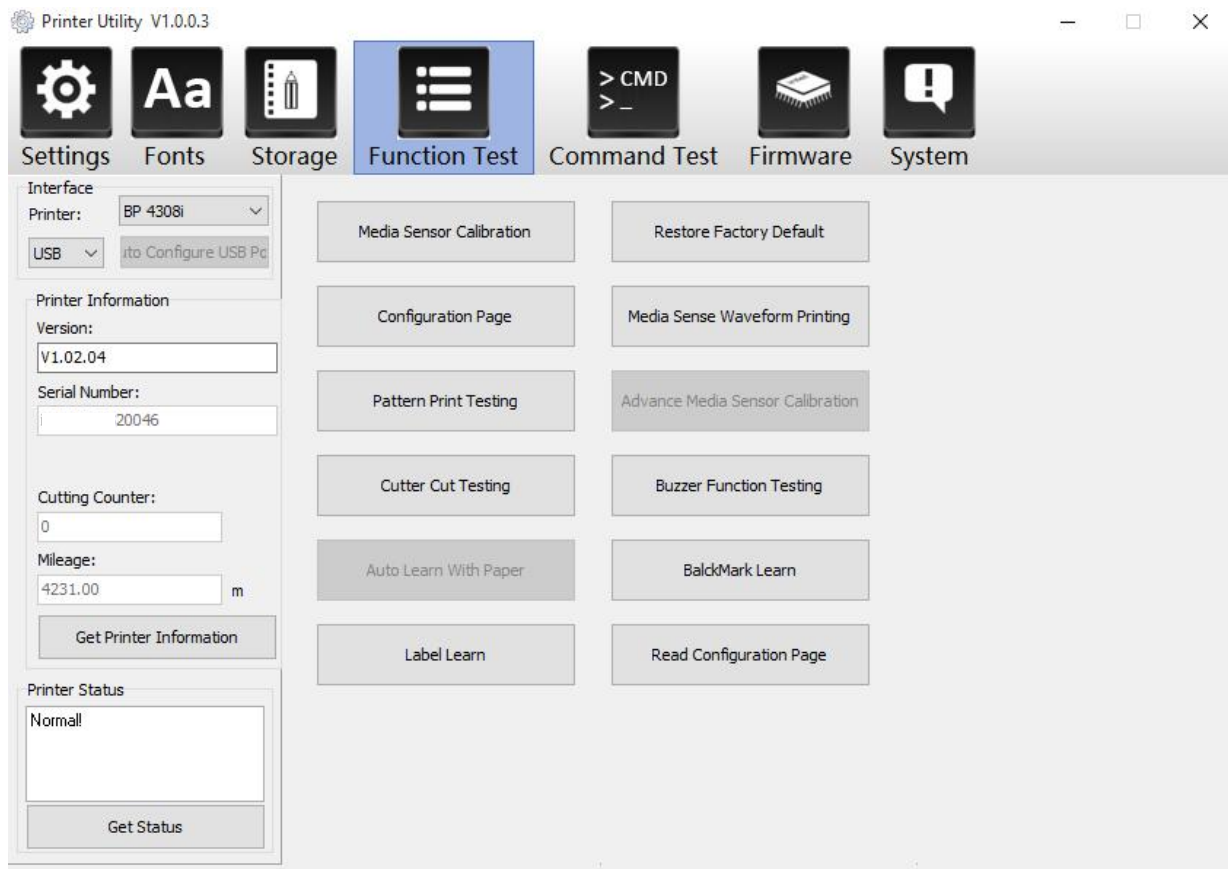

(3) Select the downloaded graphic, and then click “Print Selected Graphic” to print the picture.

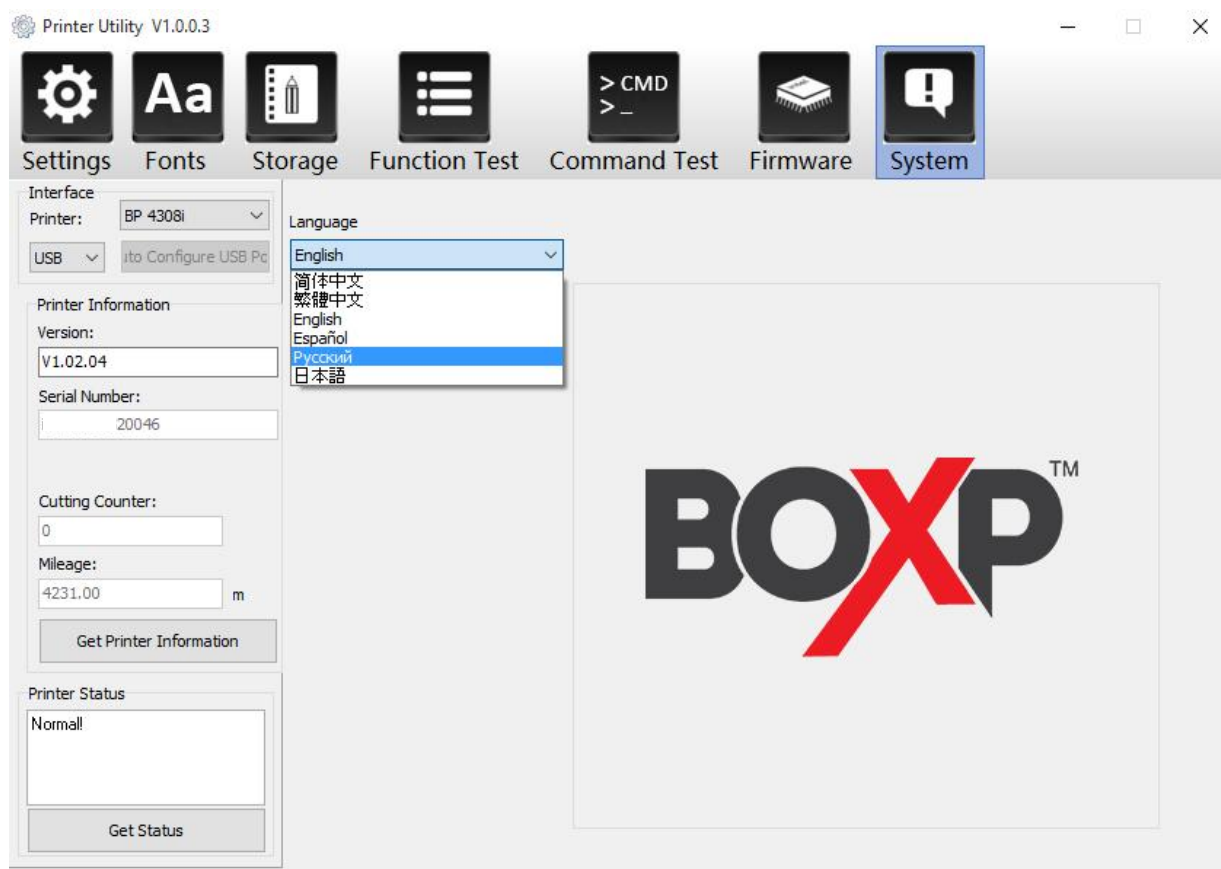

(4) You can set a magnification of the graphic as needed.

5. Click “Function Test”. User can carry the followings such as sensor calibration, pattern print testing and so on.

6.Click “System”. Click “language” and choose the language of printer utility.

## **Chapter 7 Seagull Windows Driver Instructions**

### **7.1 Introduction**

The following operating systems are supported for usage.

- Windows Vista, Windows 7, Windows 8, Windows 8.1, Windows 10
- Windows Server 2008, 2008 R2, 2012, 2012 R2, 2016
- 32-bit and 64-bit (x64) editions.

### **7.2 Windows Driver Preparation**

Download Seagull Windows Driver application.

## 7.3 Driver Installation

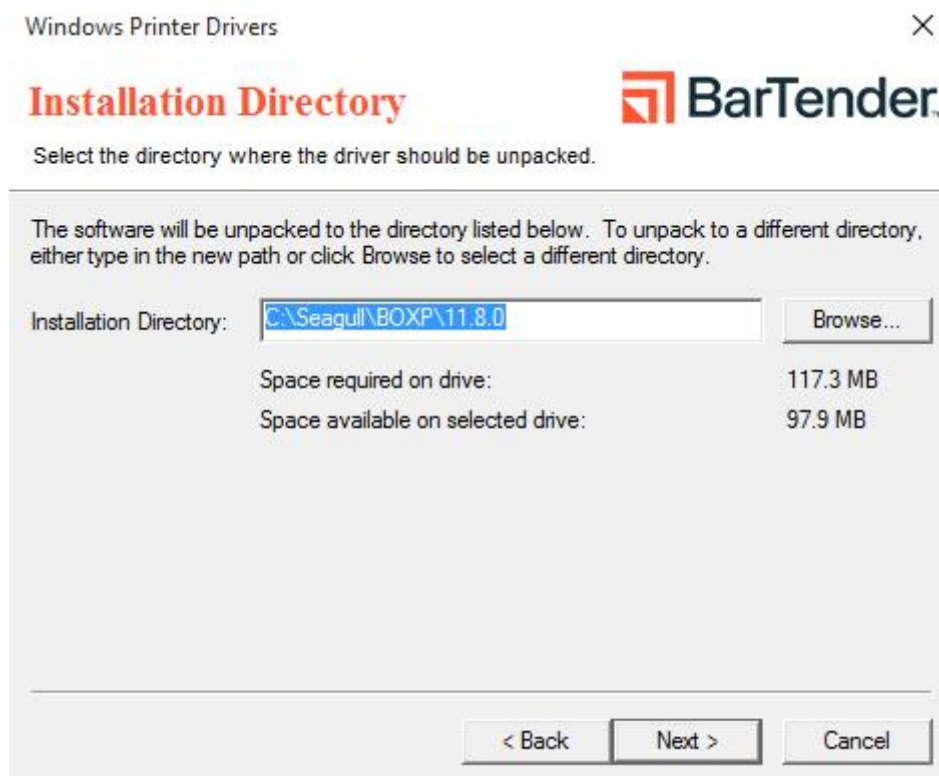

**Note:**

- Under different operating system, the screen has slight difference. The following example is based on the Windows 10 operating system.
- It is recommended to close the relevant security protection software before installation to avoid affecting the installation of the driver.

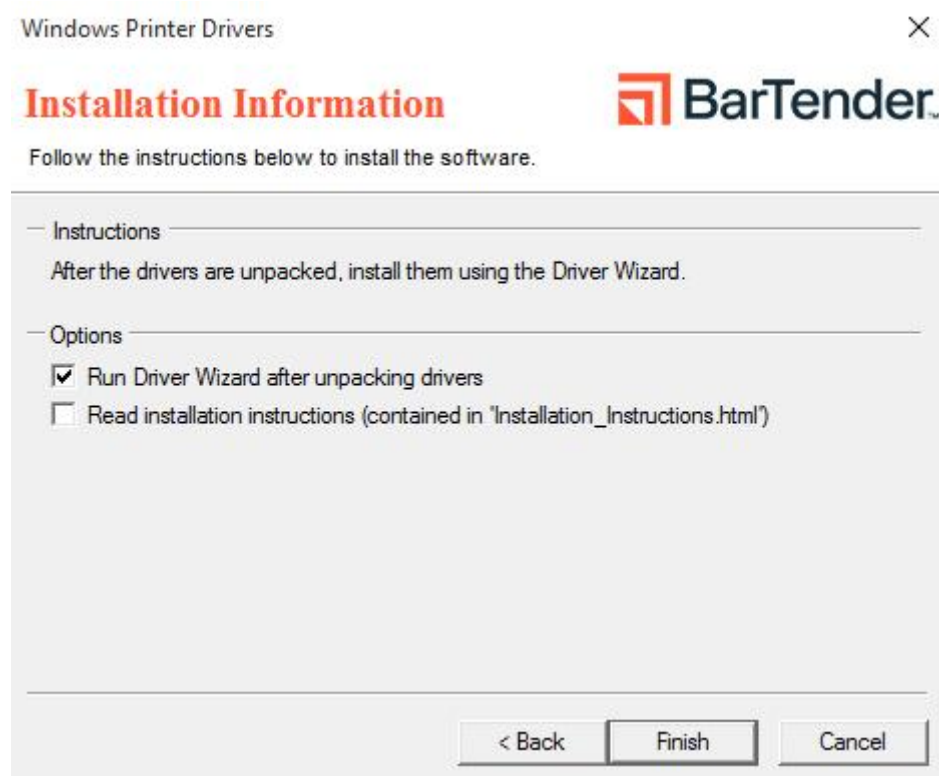

1. Select one interface to connect your printer to computer.
2. Turn on the printer check if it successfully connected to computer.
3. Double click Seagull Windows Driver.
4. Read and agree the license agreement. Then click "Next".

5. Choose the installation directory, then click "Next".

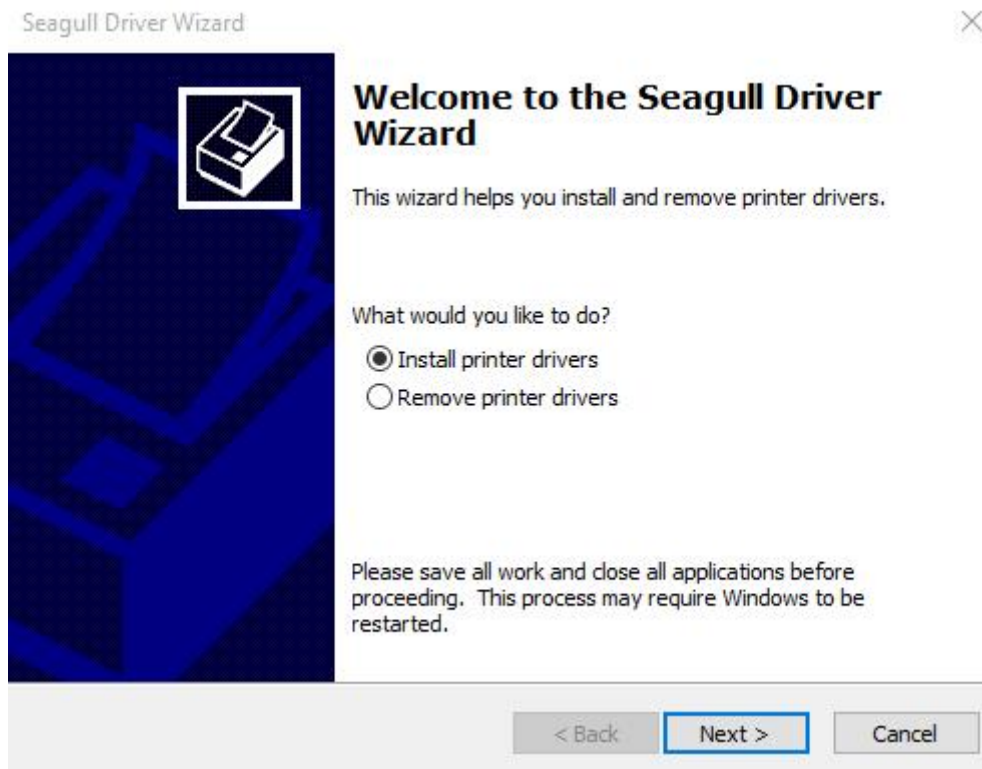

6. Select "Run Driver Wizard after unpacking drivers", then click "Finish".

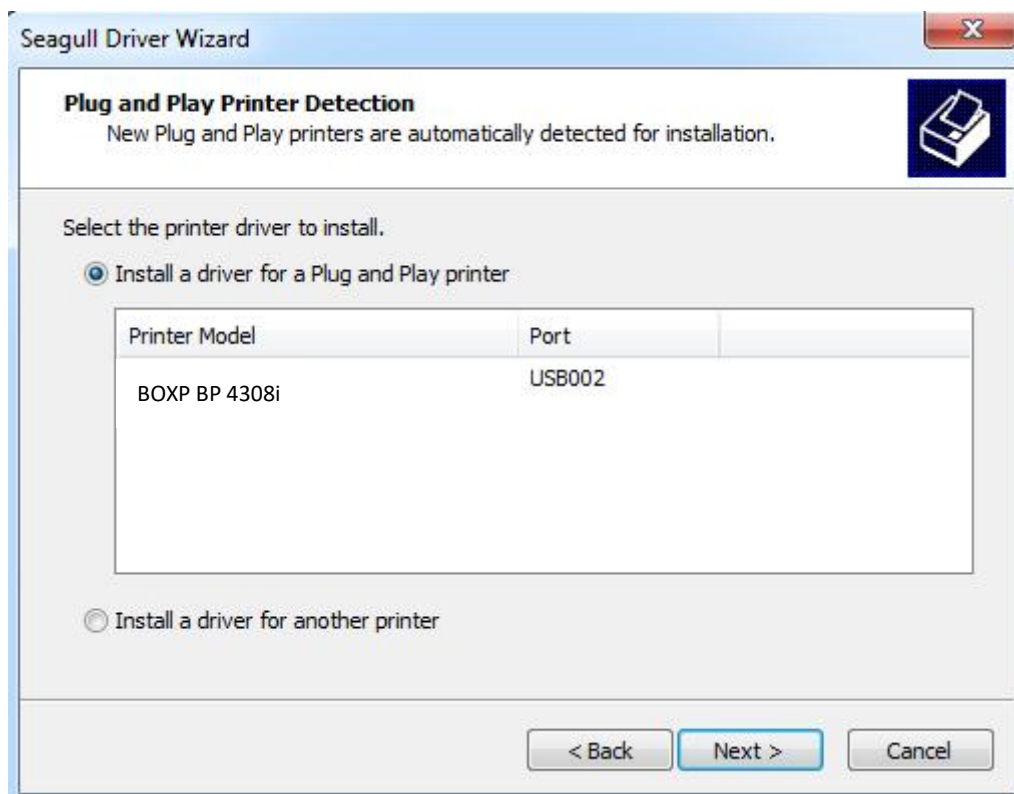

7. Choose "Install printer drivers" , then click "Next".

**Note:** If you have connected the printer to computer, it will detect and install the driver automatically. (eg.: USB port) .

8. Choose "Install a driver for a Plug and Play printer, then click "Next".

9. Enter a name for this printer, then click "Next".

Seagull Driver Wizard

**Specify Printer Name**  
Names are used to identify the printer on this computer and on the network.

Enter a name for this printer.

Printer name:

☐ Use this printer as the default printer

Specify whether or not you want to share this printer with other network users. When sharing, you must provide a share name.

☒ Do not share this printer

☐ Share name:

< Back   Next >   Cancel

10. Click "Finish".

Seagull Driver Wizard

**Completing the Seagull Driver Wizard**

A new printer will be installed using the following settings:

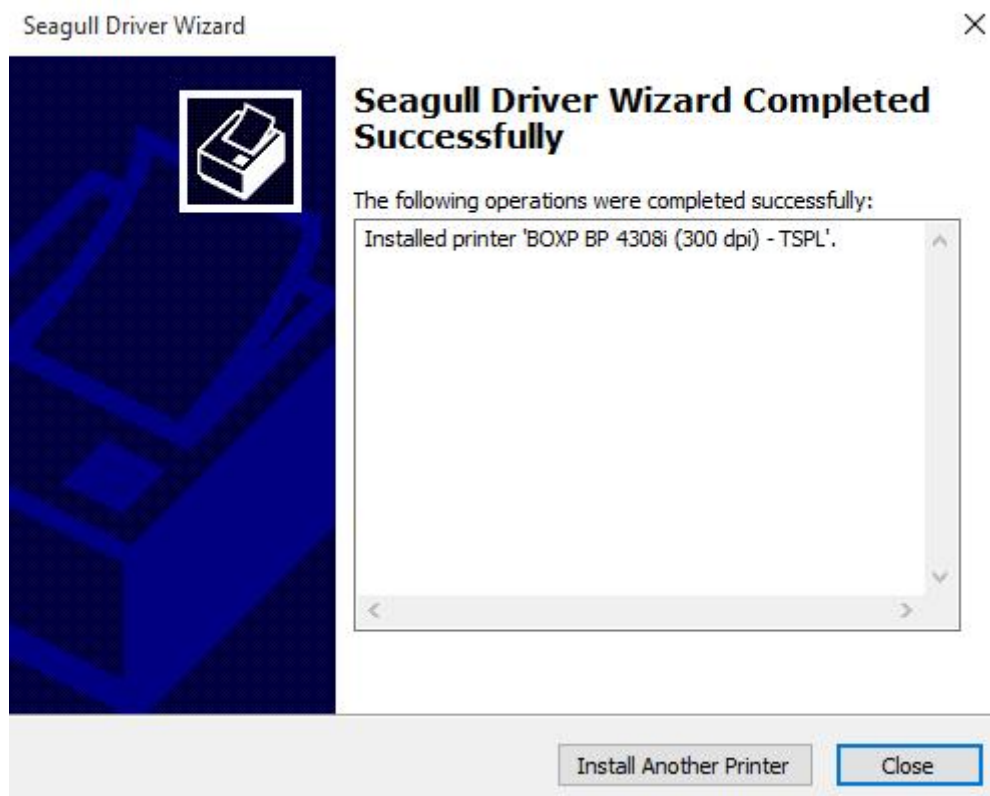

Name:	BOXP BP 4308i (300 dpi) - TSPL
Share name:	<Not Shared>
Port:	LPT1:
Default:	No
Manufacturer:	BOXP
Model:	BOXP BP 4308i (300 dpi) - TSPL
Version:	11.8.0 (09/15/2025)

Number of installed printers to be upgraded: 0

To begin the driver installation process, click Finish.

< Back   Finish   Cancel

11. Click "Close", and the driver is installed successfully.

12. After installation, the icon will be found in "Start" → "Settings" → "Devices" → "Devices and printers".

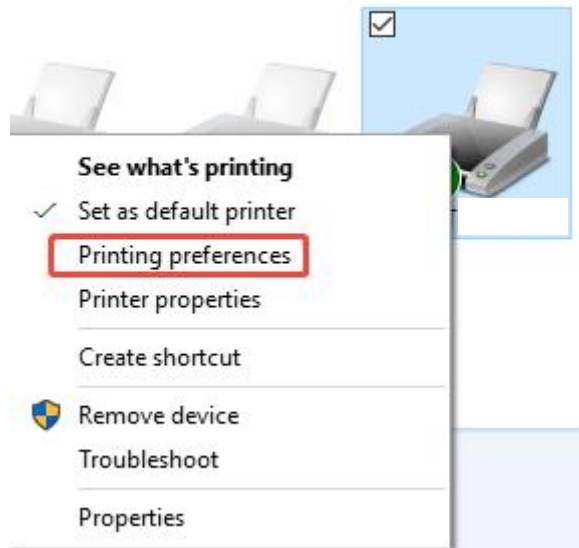

**Note:**

- If already installed the driver (No matter what kind of port), when you connect the printer with computer via USB, it will create a USB port automatically.
- Any problems exist, please use our utility tool.

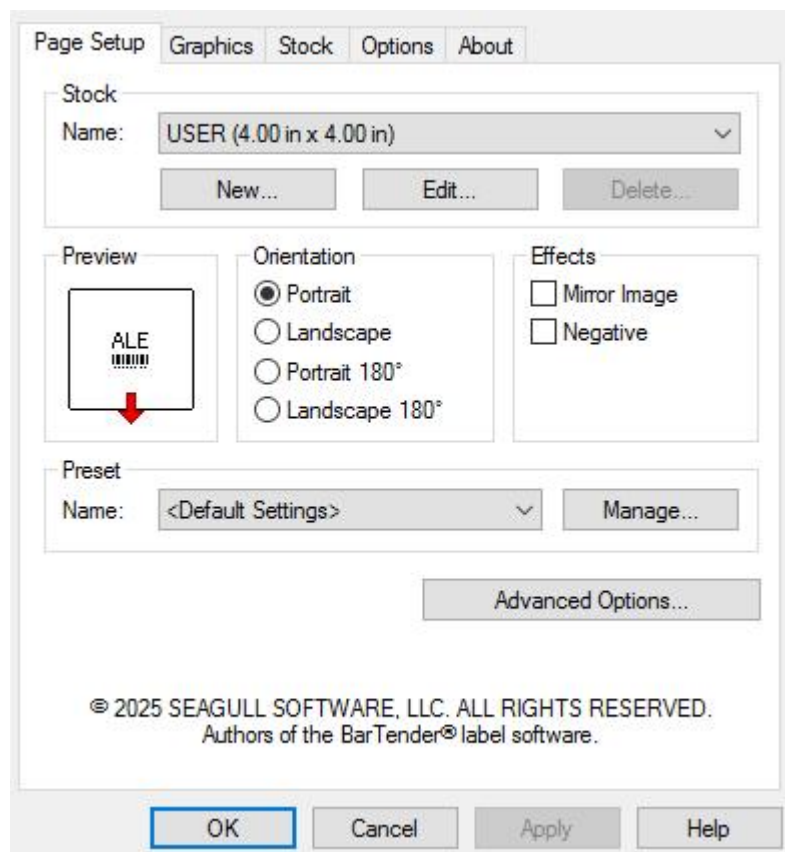

## 7.4 Usage

### 7.4.1 Printing Preferences

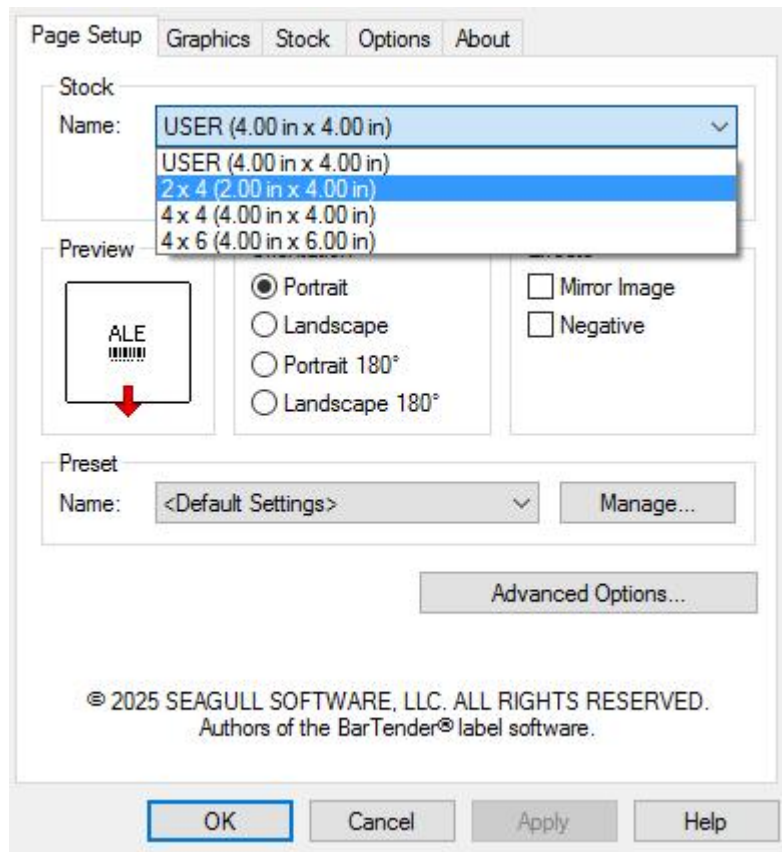

1. Click “Start”→"Settings" → "Devices" → “Devices and printers”. Right click icon and choose “Printing preferences”.

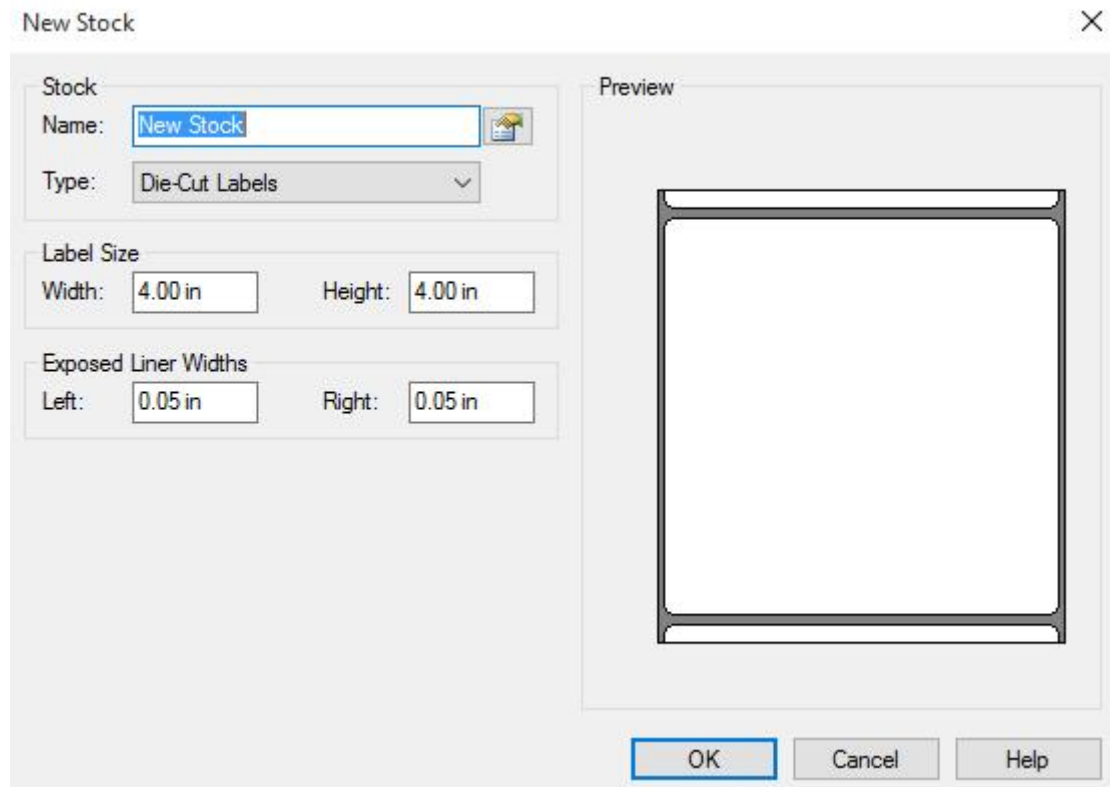

2. According to different needs, set up the page.

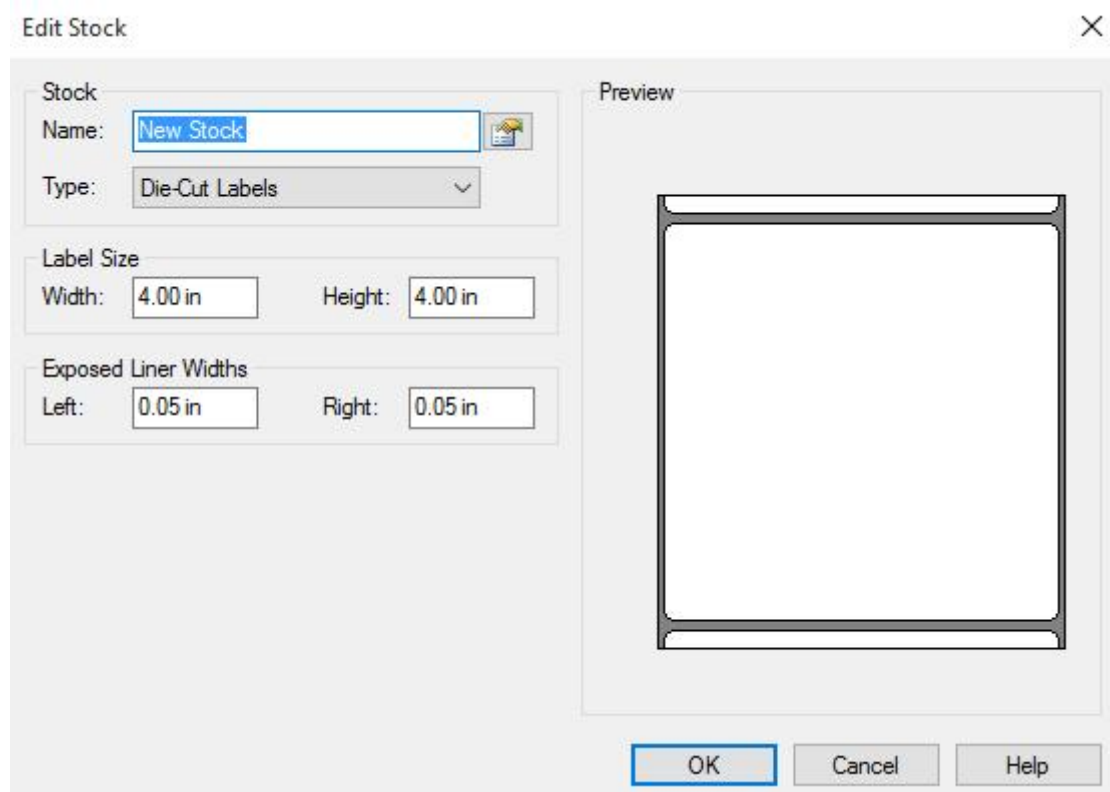

- Click “Stock”→“Name”, and choose the paper type.

- Click “New Stock”, and set up a new stock.

- Click “Edit Stock”, and edit the stock.

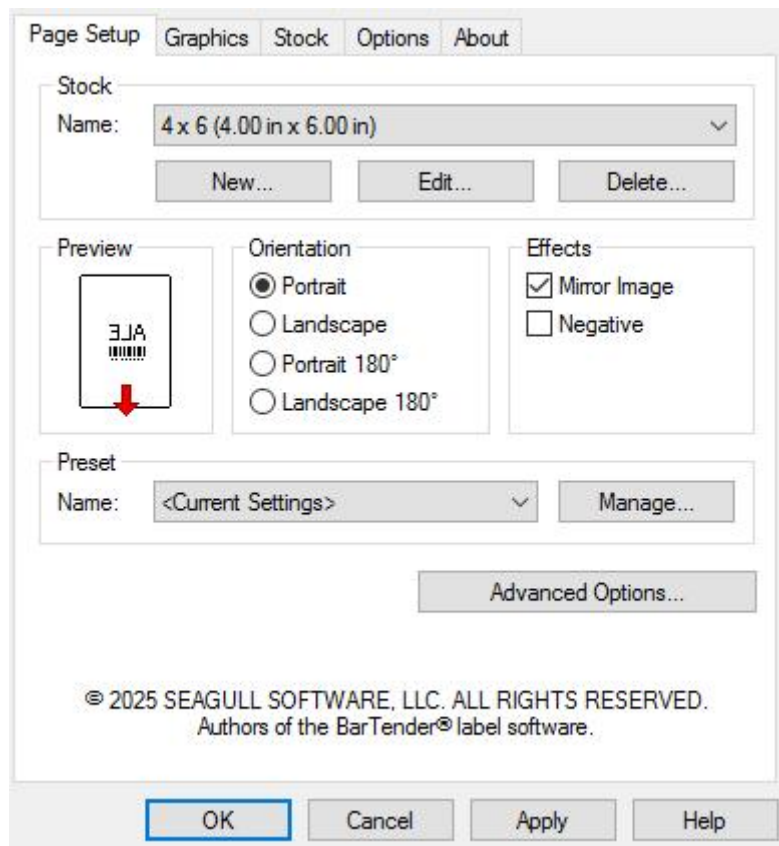

- Click “Delete Stock”, and delete the stock.

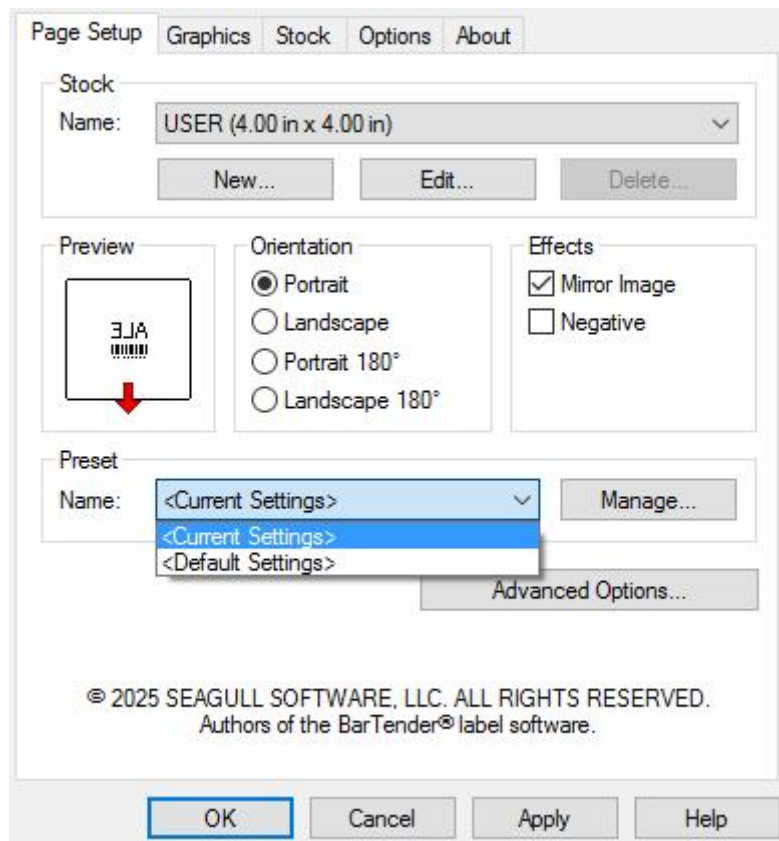

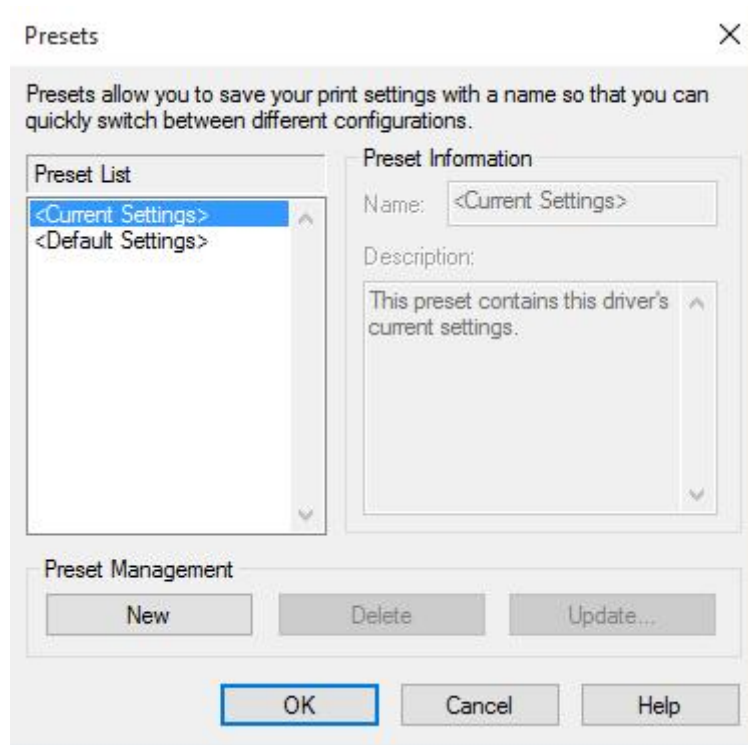

- Choose “Orientation” or “Effects”, showed in the “Preview”.

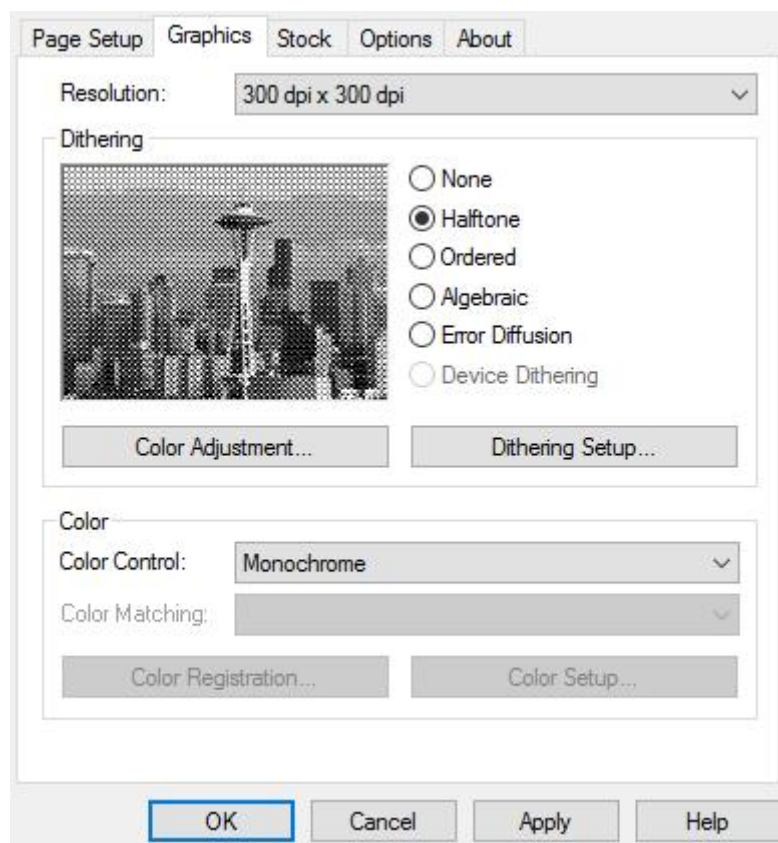

- Click “Preset” → “Name”, and back to the default settings.

- Click “Manage”, and change the settings.

3. Click “Graphics”, and edit the pictures.

4.Click “Stock”.

- Set up the media type.

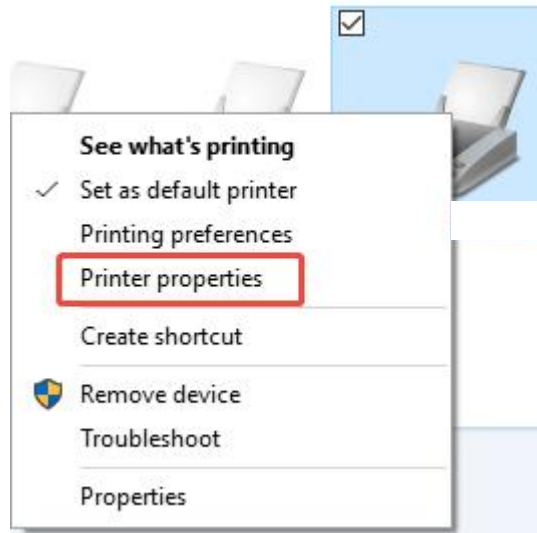

- Click “Feed Mode”→“Mode”, and choose the method of media handling.

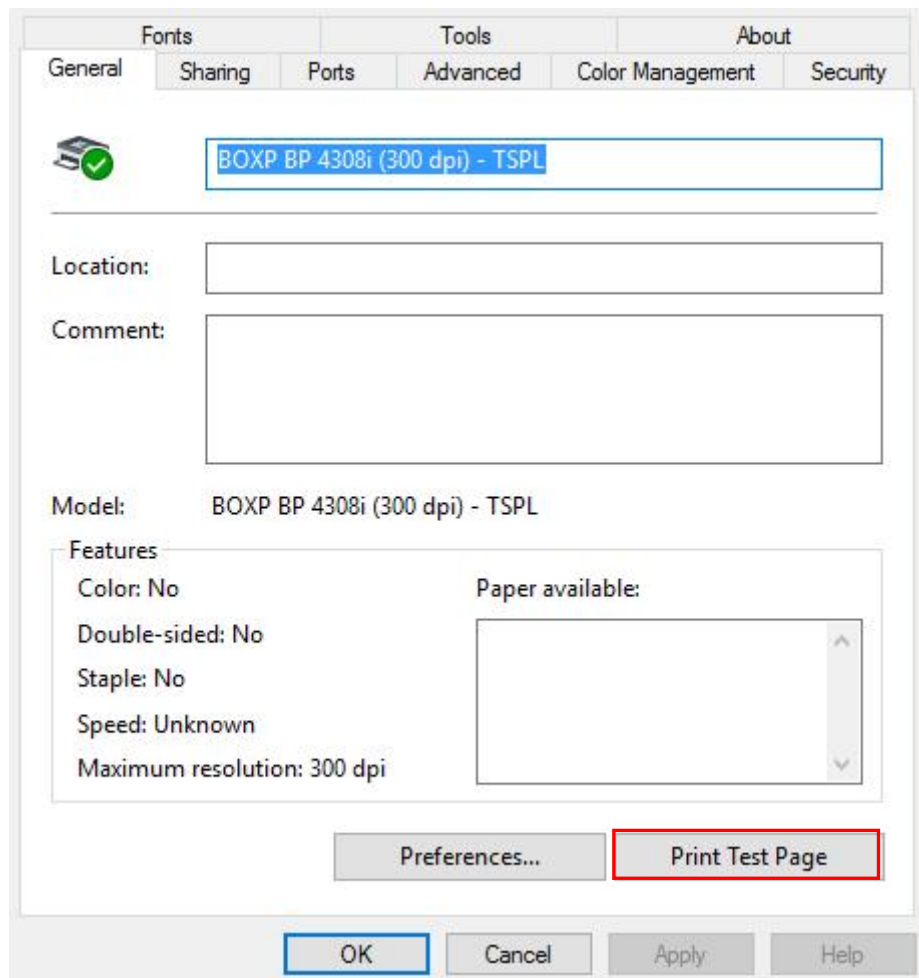

## 7.4.2 Printer Properties

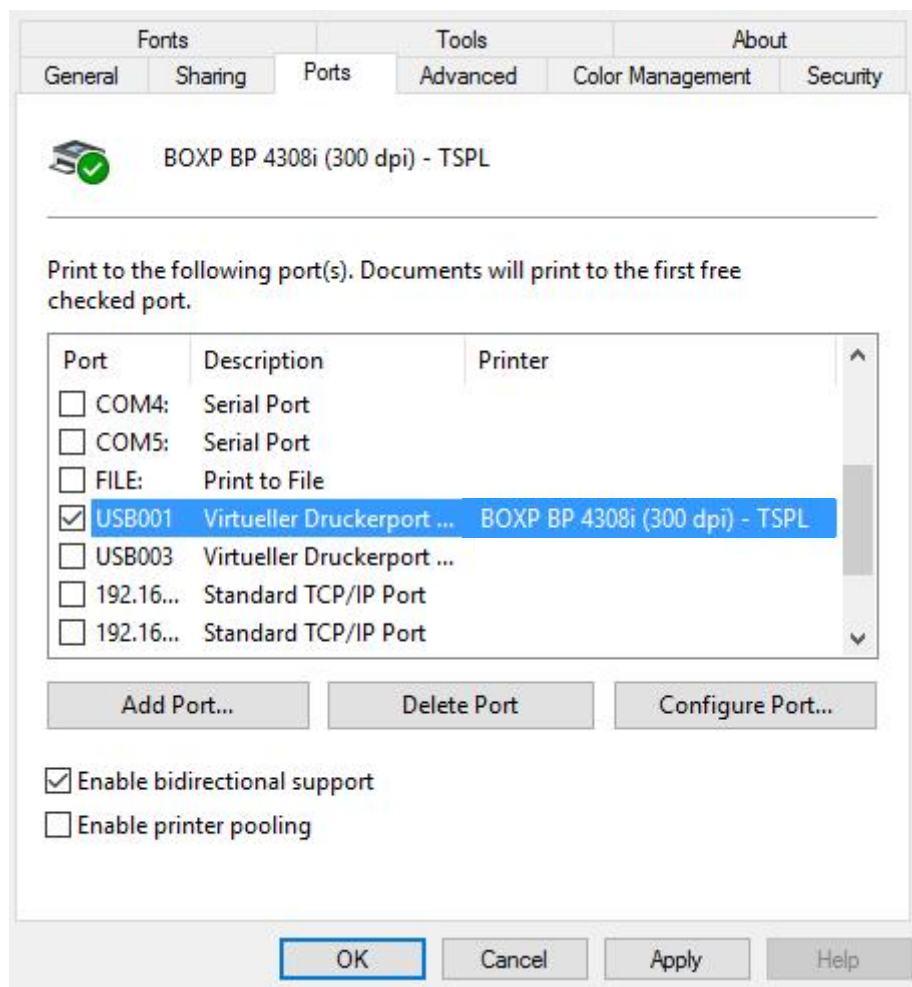

1. Click "Start" → "Settings" → "Devices" → "Devices and printers". Right click icon and choose "Printing properties".

2. Click "General" → "Print Test Page", and printer will print labels with current settings.

3.3. Click “Ports”, and choose the port needed.

## **Chapter 8 Windows Driver Instructions**

### **8.1 Introduction**

The following operating systems are supported for usage.

- Microsoft Windows 11
- Microsoft Windows 10 (32 bit/64 bit)
- Microsoft Windows 8 (32 bit/64 bit)
- Microsoft Windows 7 (32 bit/64 bit)
- Microsoft Windows Vista (32 bit/64 bit)
- Microsoft Windows Server 2019

### **8.2 Windows Driver Preparation**

Download the Windows driver installation: BOXP Label Printer Driver vX X.X.X.

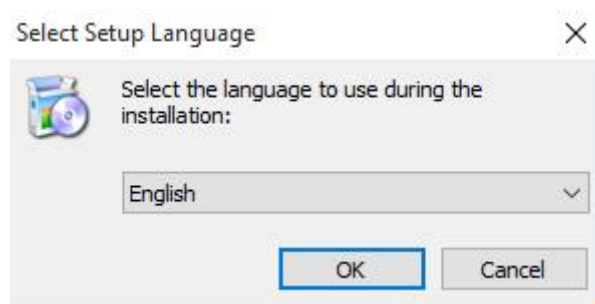

## 8.3 Driver Installation

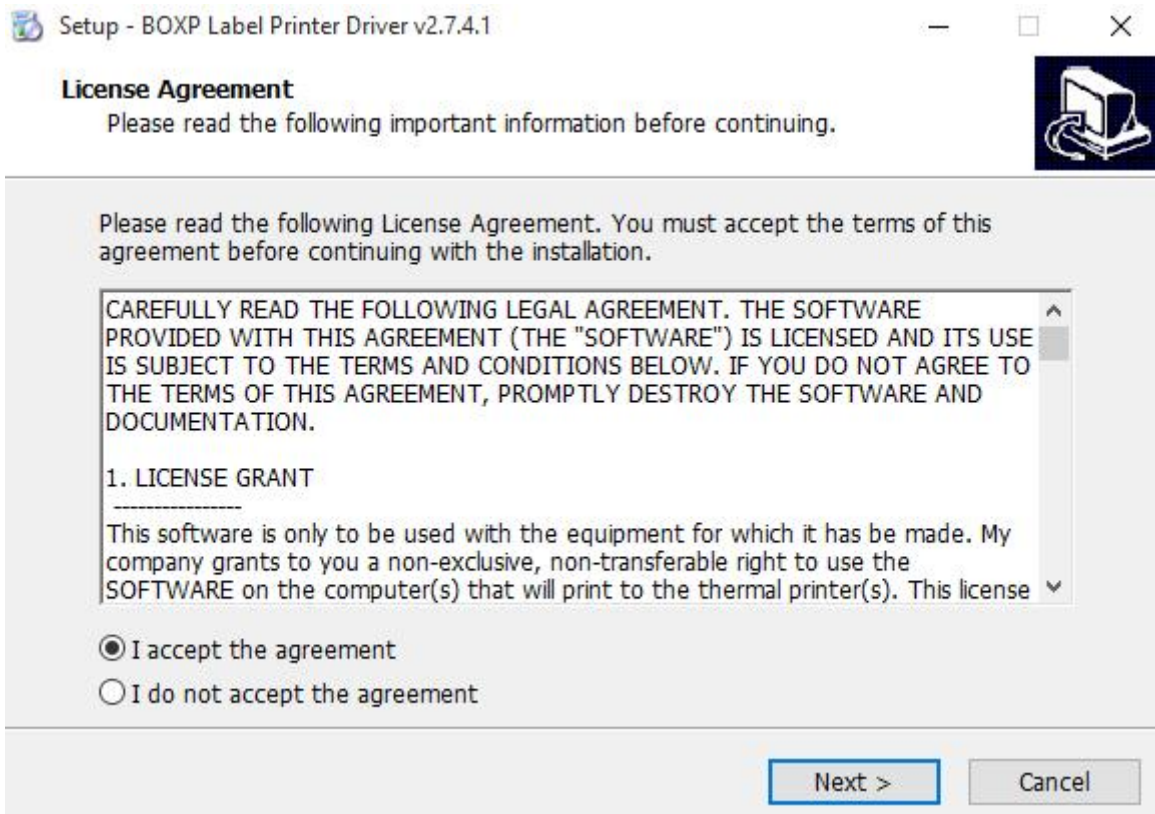

**Note:**

- Under different operating system, the screen has slight difference. The following example is based on the Windows 10 operating system.
- It is recommended to close the relevant security protection software before installation to avoid affecting the installation of the driver.

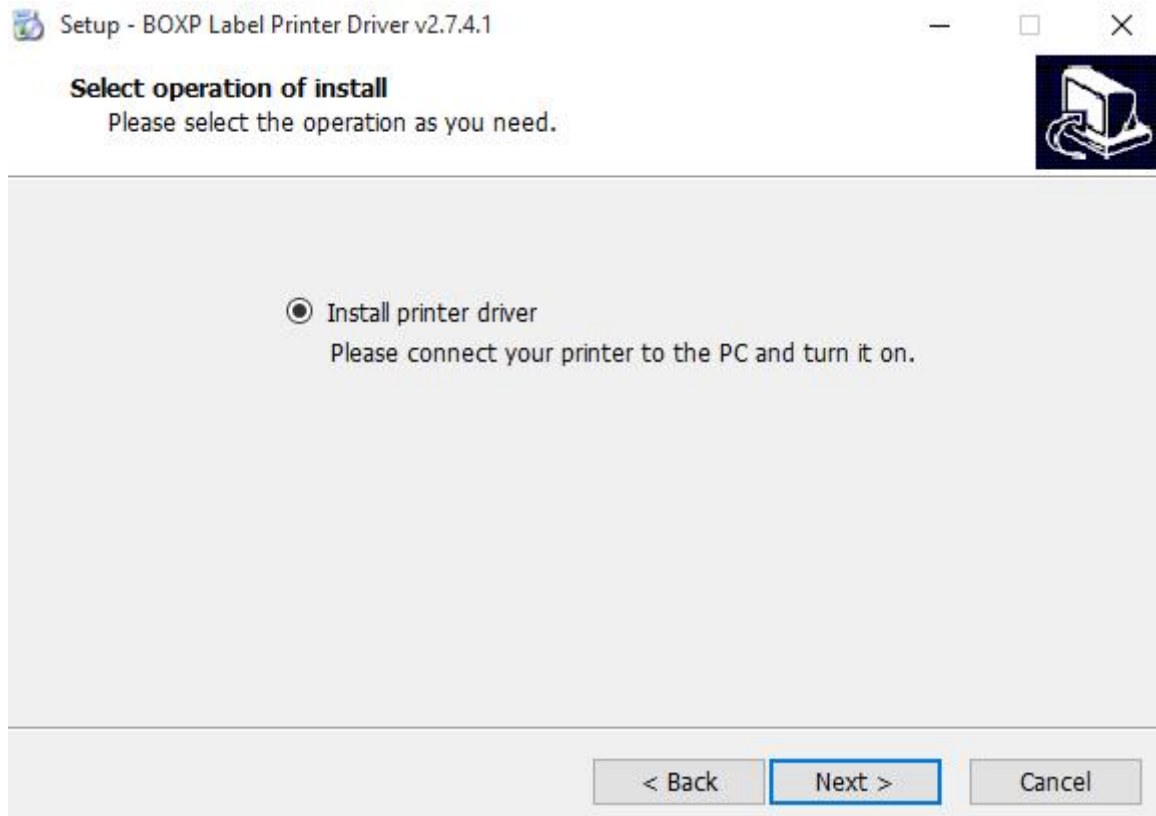

1. Select one interface to connect your printer to computer.
2. Turn on the printer check if it successfully connected to computer.
3. Double click Windows Driver Software.
4. Select the language and click 'OK'.

5. After agree to the EULA, click "Next".

6.Click "Next".

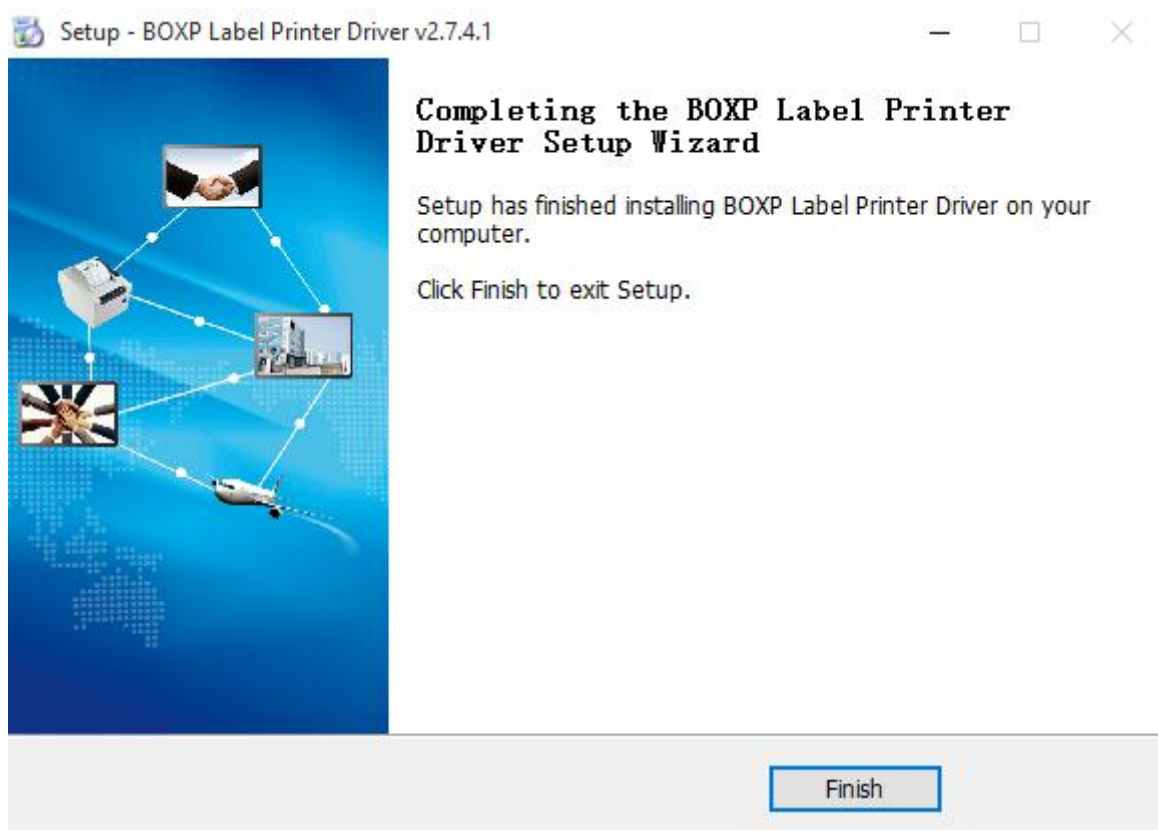

7.Select the printer driver port and click 'Next'.

8.Click "Finish".

If you already installed the driver (No matter what kind of port), when you connect the printer with computer, it will create a USB port automatically. **(Taking connecting a USB port as an example)**

9.After installation, the icon will be found in "Start" → "Settings" → "Devices" → "Devices and printers".

**Note:**

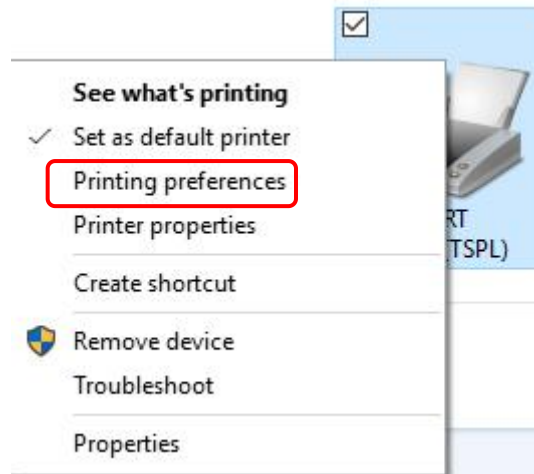

- If already installed the driver (No matter what kind of port), when you connect the printer with computer via USB, it will create a USB port automatically.
- Any problems please use our utility.

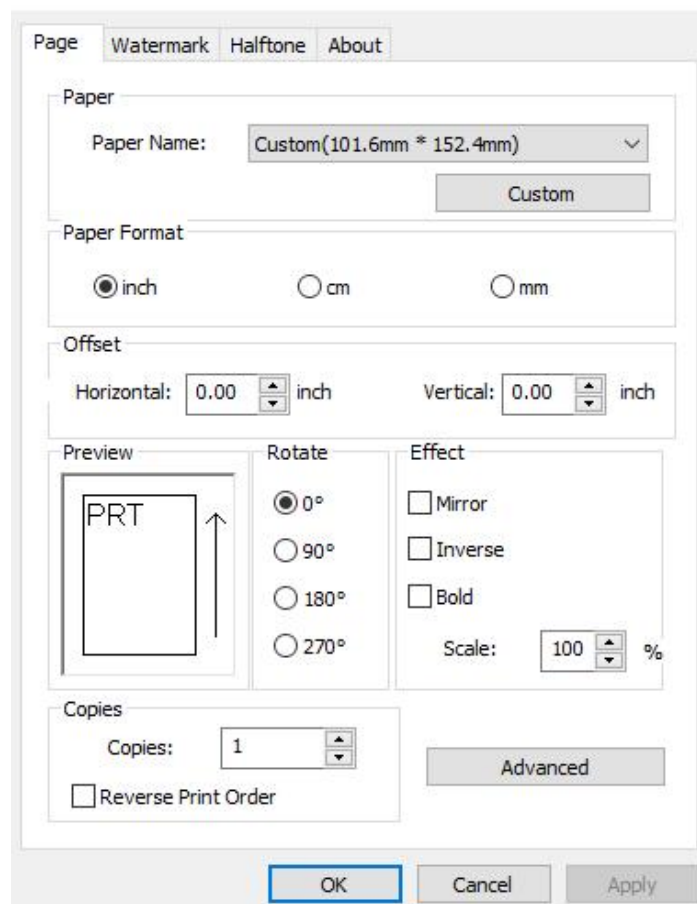

## 8.4 Usage

### 8.4.1 Printing Preferences

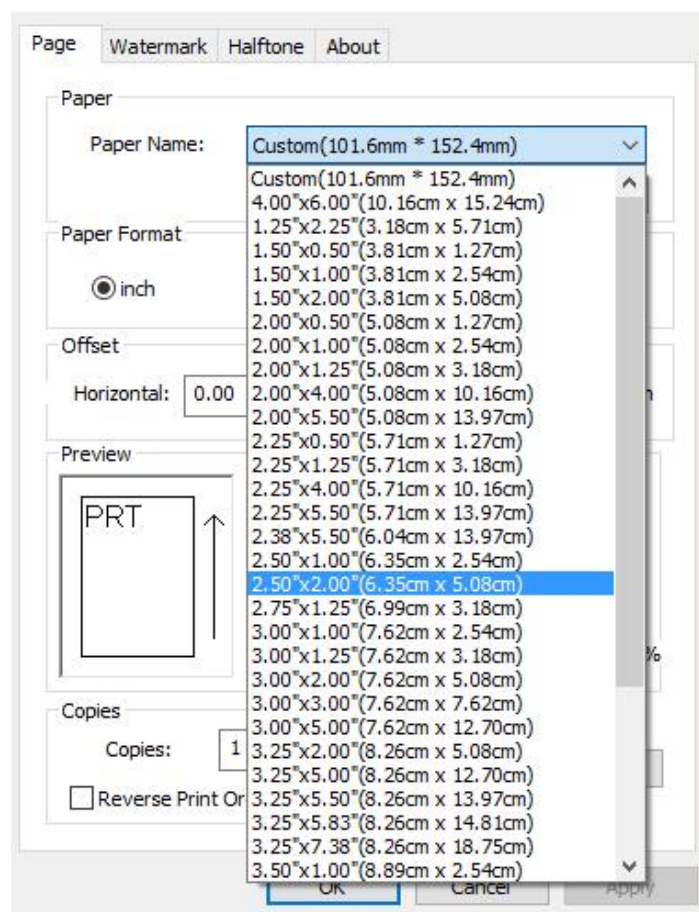

1. Right click the icon and choose "Printing preferences".

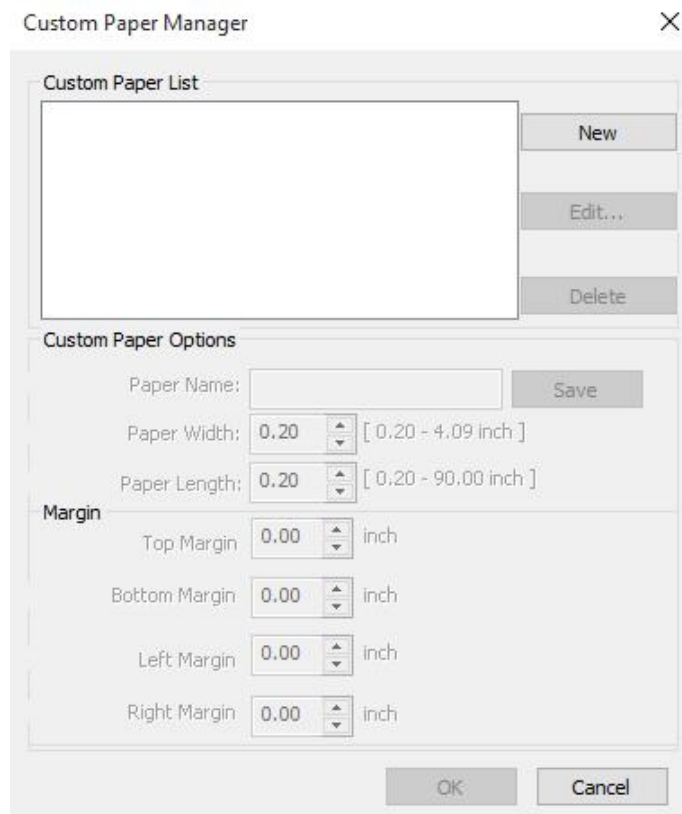

5. According to different needs, set up the page.

- Click “Page Name” and select the paper type.

- Click “Custom” to add or delete paper.

- Click "Horizontal" or "Vertical" to edit the offset effect.

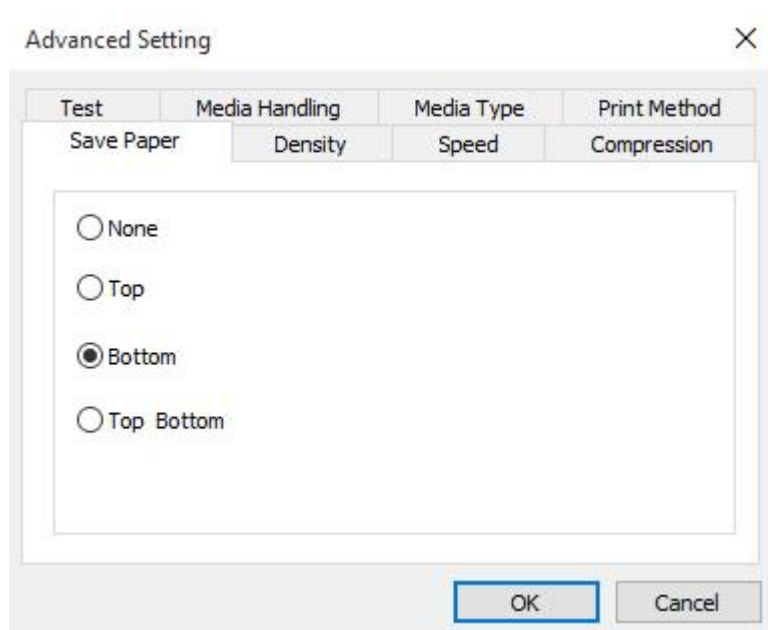

The screenshot shows the 'Page' dialog box with tabs for 'Page', 'Watermark', 'Halftone', and 'About'. The 'Paper' section has a 'Paper Name' dropdown set to 'Custom(101.6mm \* 152.4mm)' and a 'Custom' button. The 'Paper Format' section has radio buttons for 'inch' (selected), 'cm', and 'mm'. The 'Offset' section is highlighted with a red box and contains 'Horizontal' and 'Vertical' input fields, both set to '0.00' with 'inch' units. Below this, the 'Preview' section shows a box labeled 'PRT' with an upward arrow. The 'Rotate' section has radio buttons for '0°' (selected), '90°', '180°', and '270°'. The 'Effect' section has checkboxes for 'Mirror', 'Inverse', and 'Bold', and a 'Scale' input set to '100 %'. At the bottom, there is a 'Copies' section with 'Copies' set to '1' and a 'Reverse Print Order' checkbox. Buttons for 'OK', 'Cancel', and 'Apply' are at the bottom right.

- Choose "Rotate" or "Effect", showed in the "Preview".

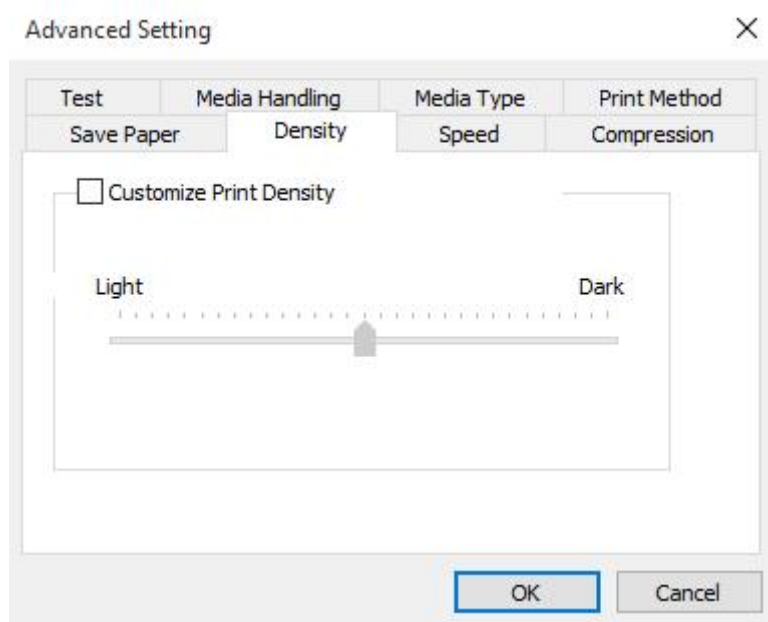

This screenshot is identical to the one above, showing the 'Page' dialog box. In this view, the 'Preview' section, which includes the 'PRT' box and the 'Rotate' and 'Effect' options, is highlighted with a red box. The 'Offset' section is no longer highlighted. All other settings and the overall layout of the dialog box remain the same.

- Click “Advanced”

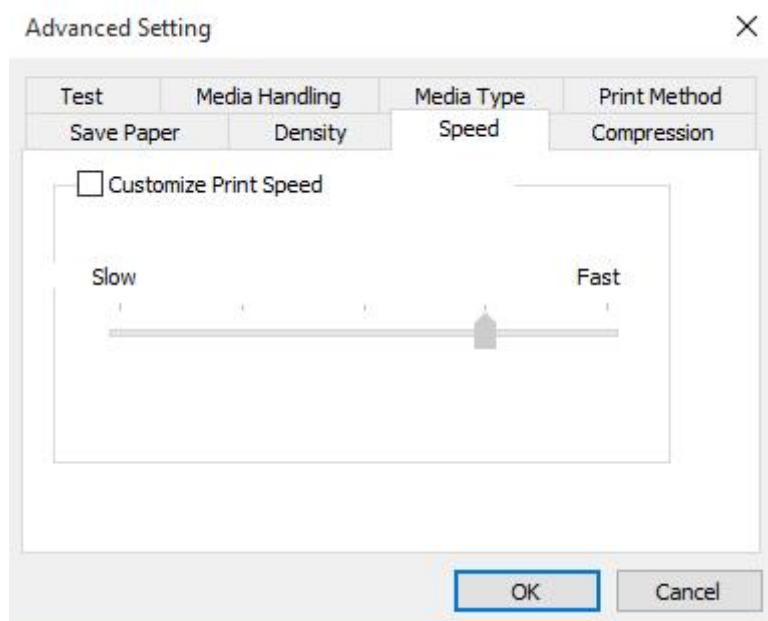

“Save Paper”:

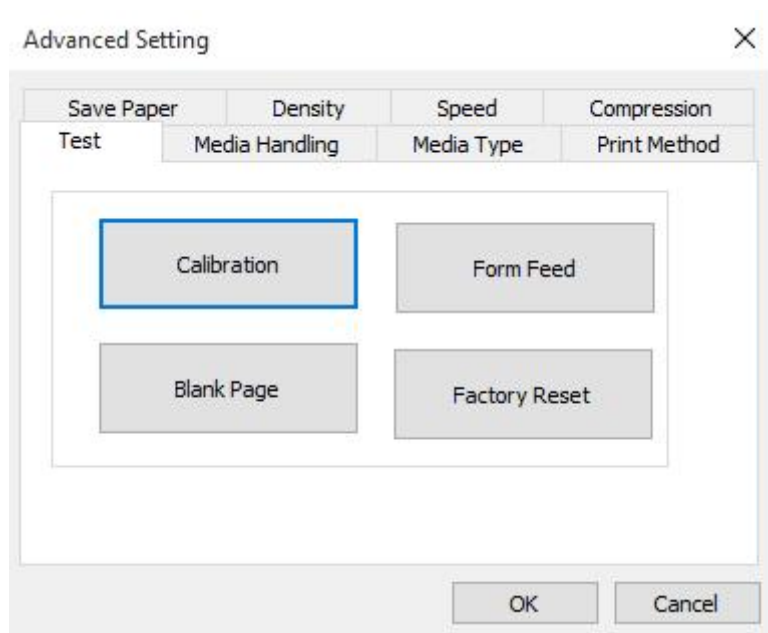

“Density”:

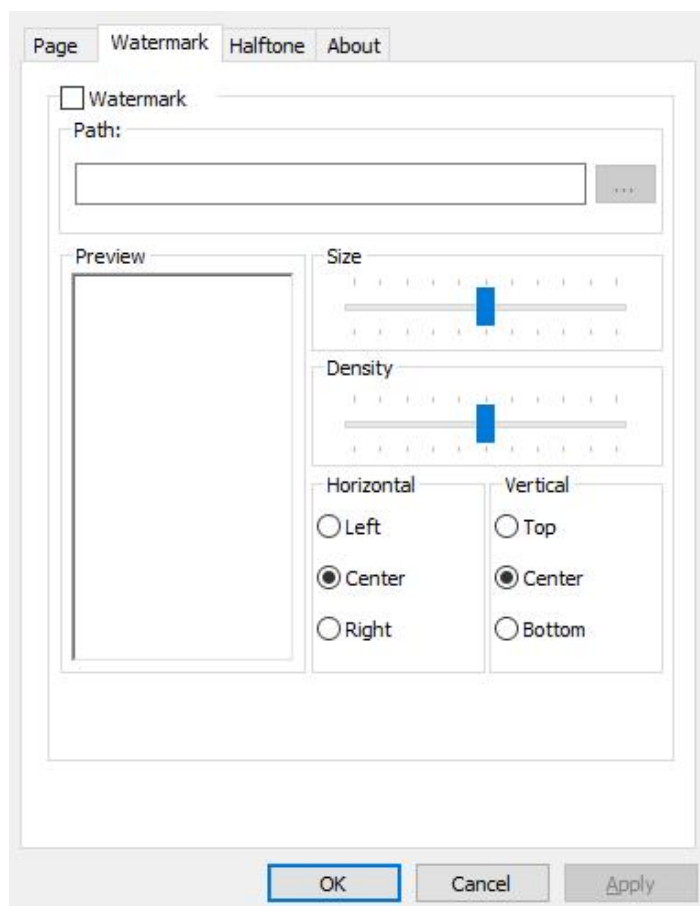

“Speed”:

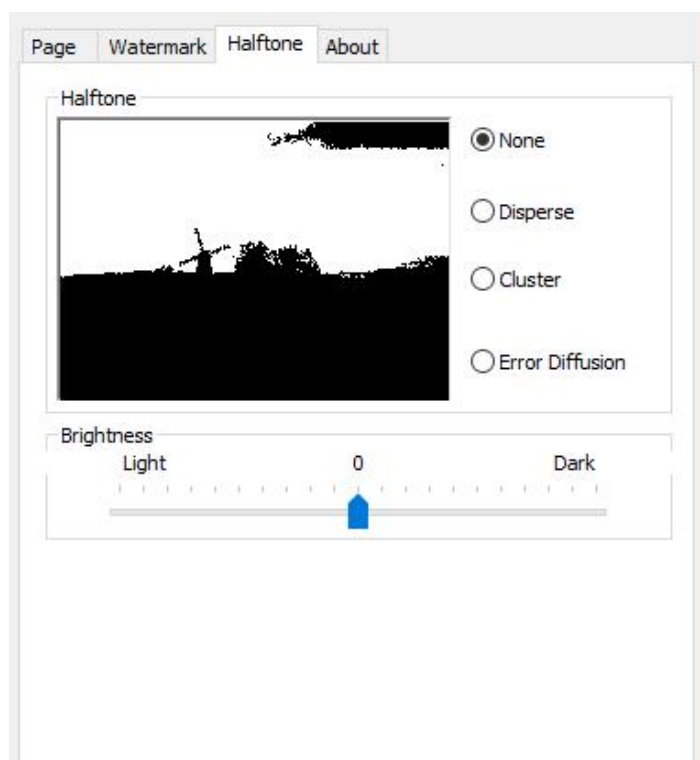

“Test”:

6.Click “Watermark”.

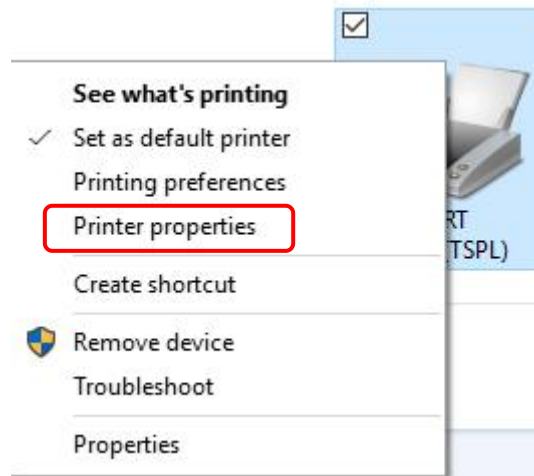

7.Click “Halftone” to set the halftone.

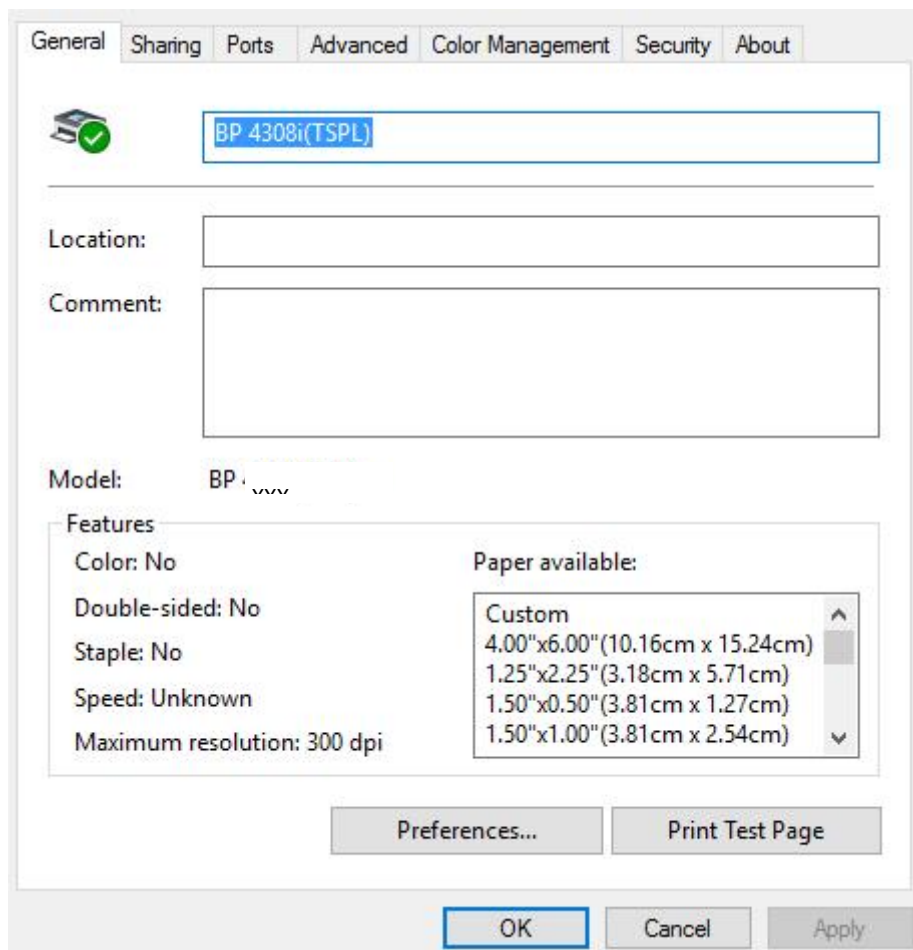

## 8.4.2 Printer Properties

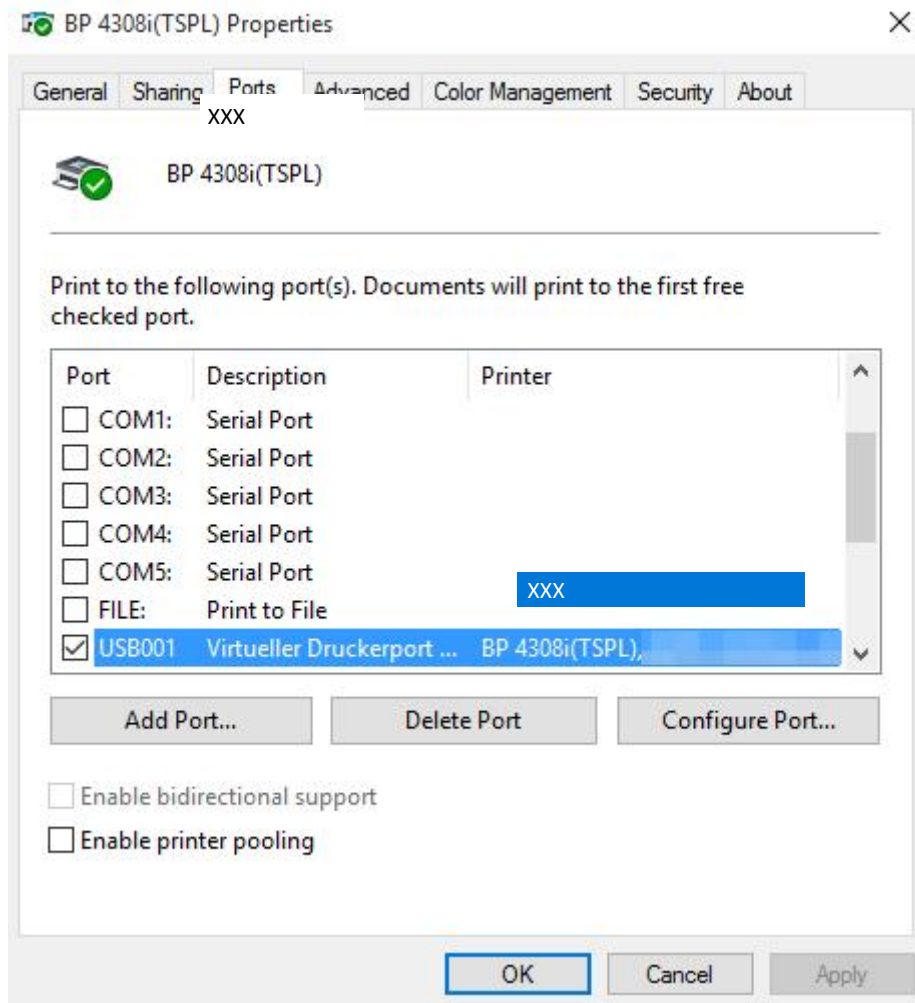

1. Right click the icon and choose "Printer properties".

2. Click "General"→"Print Test Page", and printer will print labels with current settings.

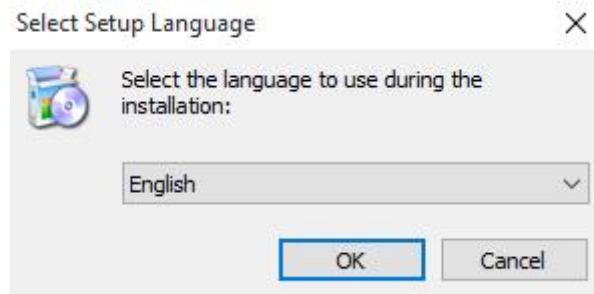

3. Click "Ports", then choose the port needed.

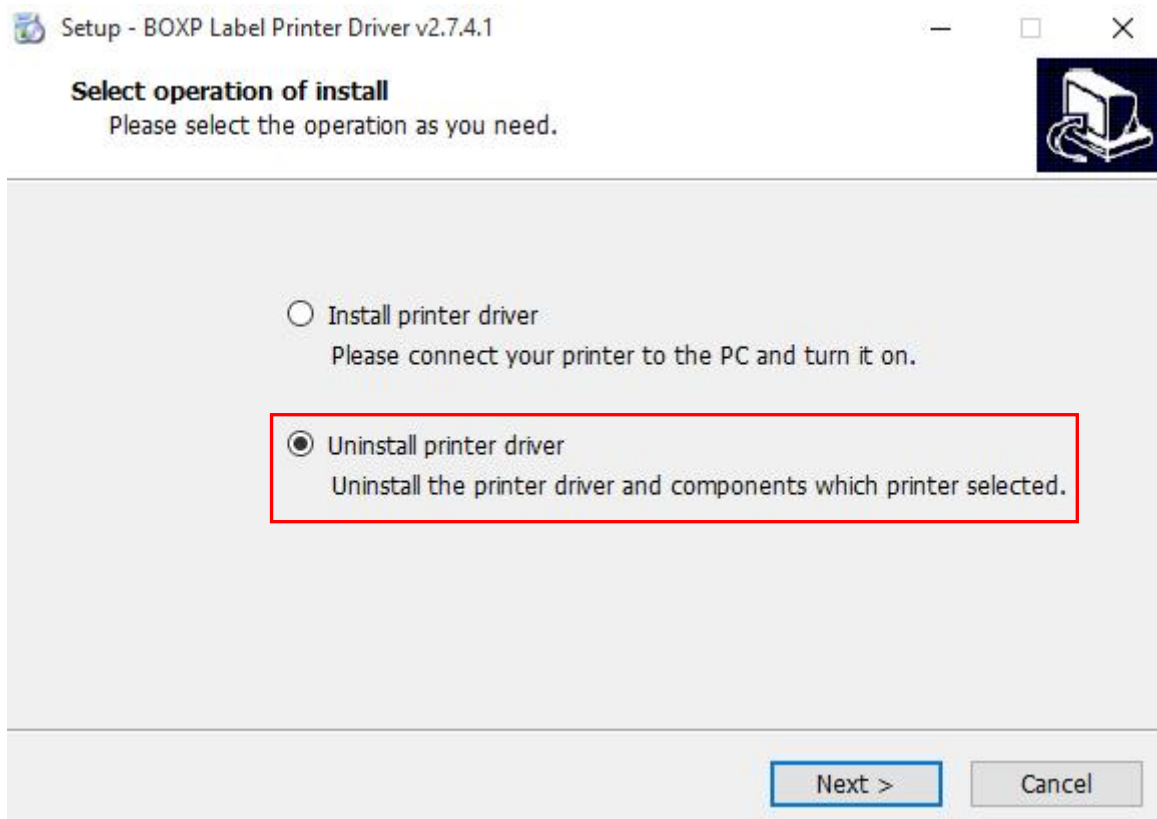

## 8.5 Uninstall Driver

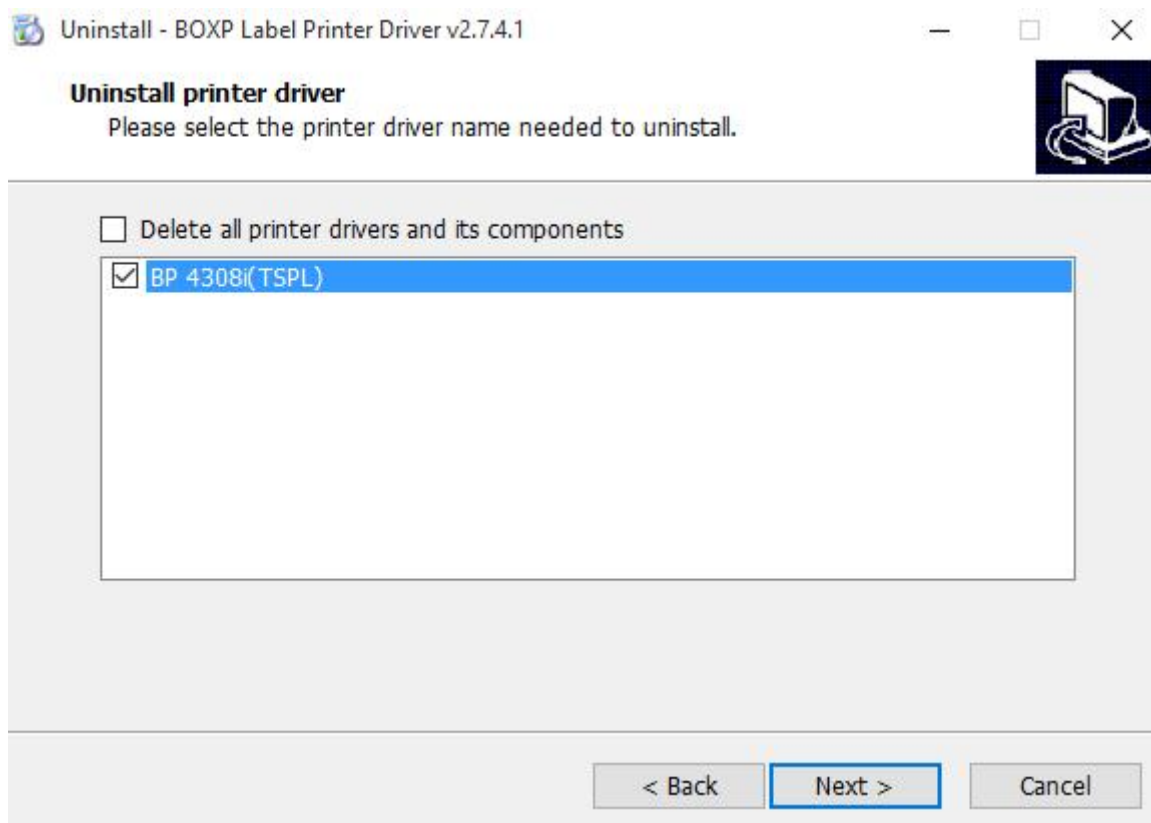

- 1.Double click Windows Driver Software.
- 2.Select the language and click 'OK'.

- 3.Choose “Uninstall printer driver”, then click “Next”.

4. Select the driver you want to uninstall and click "Next".

## Chapter 9 BarTender Ultralite Instructions

### 9.1 Introduction

The following operating systems are supported for usage:

- Windows Vista, Windows 8.1, Windows 8, Windows 7, Windows 10
- Windows Server 2016, Server 2012, 2012 R2, Server 2008, 2008 R2
- all 32-bit and 64-bit (x64) editions.

### 9.2 Installation Preparation

Download BarTender Ultralite application.

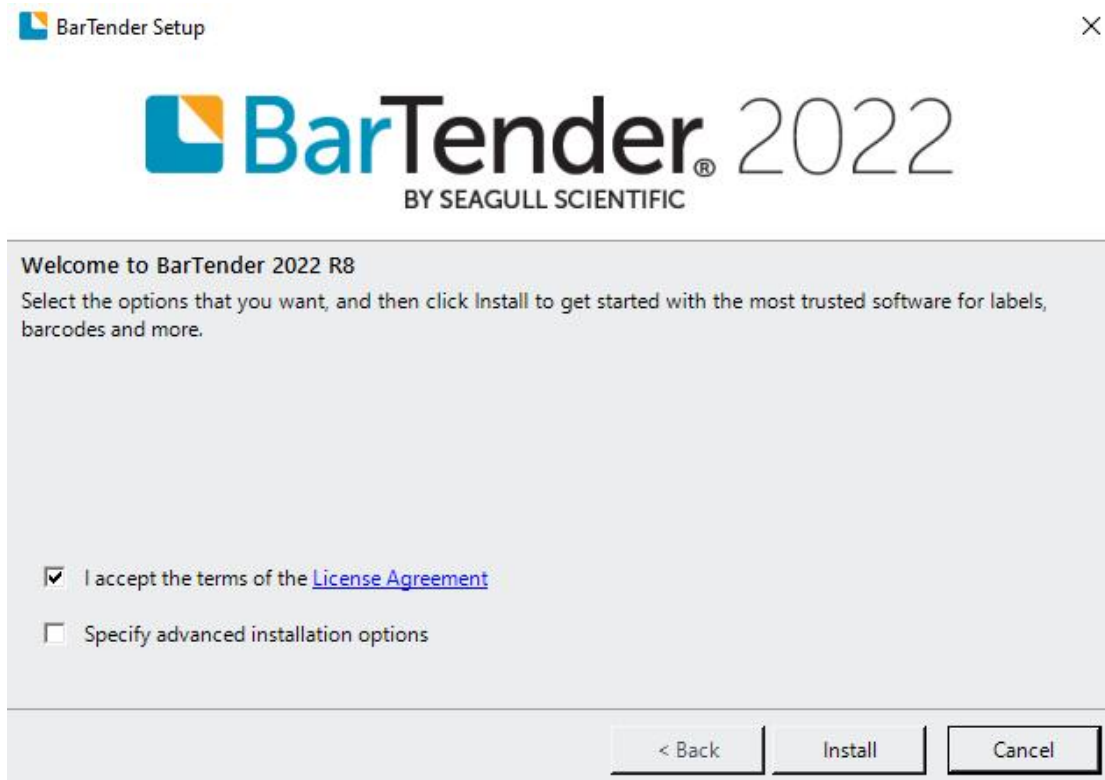

## 9.3 Installation

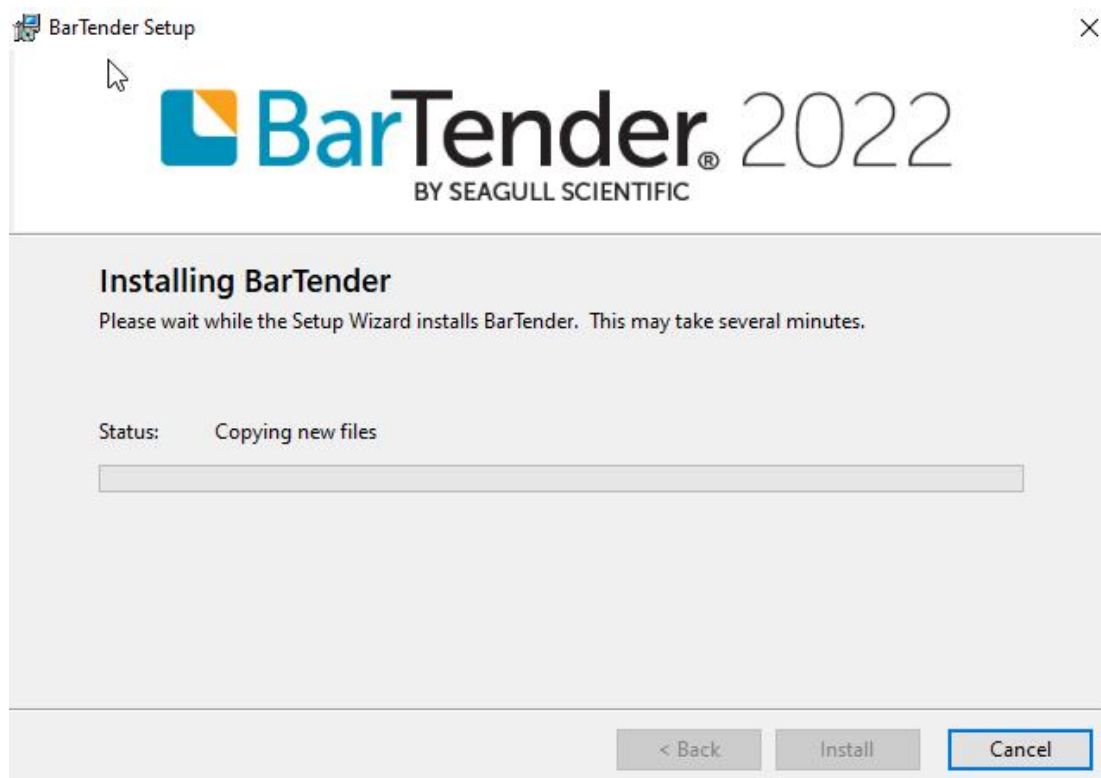

**Note:**

- Under different operating system, the screen has slight difference. The following example is based on the Windows 10 operating system.
- It is recommended to close the relevant security protection software before installation to avoid affecting the installation of the application.

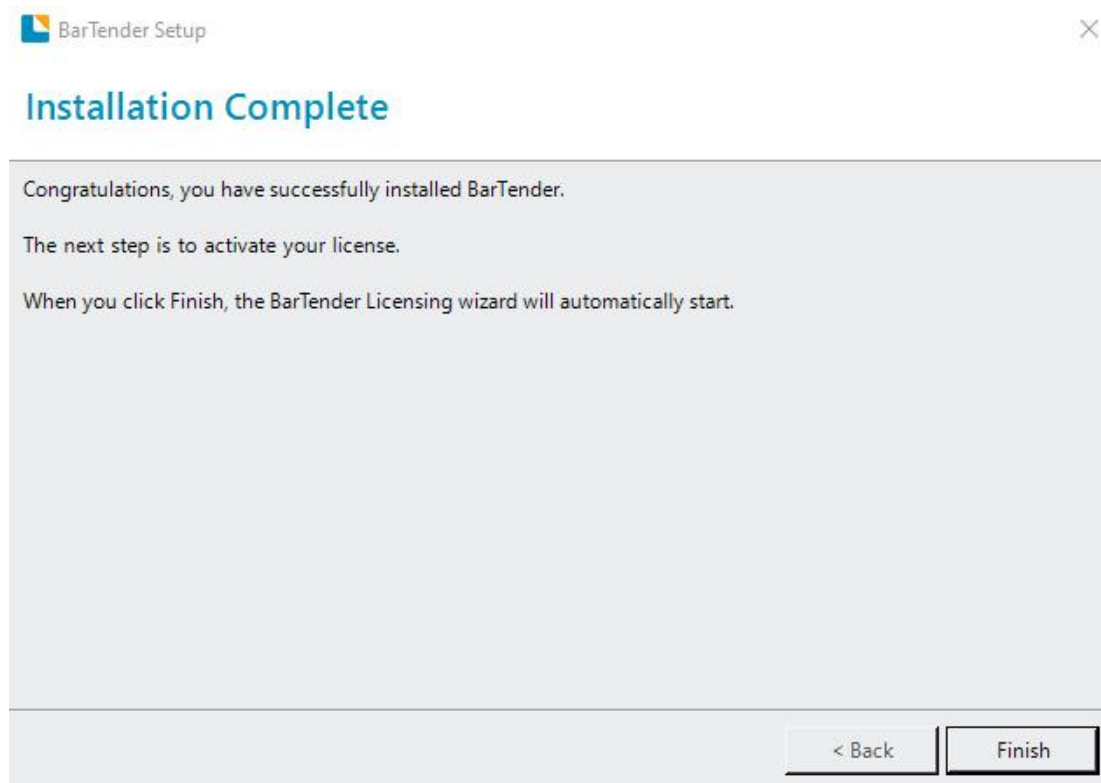

1. Double click the application program .
2. Click "Install".

This may take several minutes.

3. Click "Finish".

4. Activate new license or find an existing license and click "Next".

BOXP Bartender Coupon Code: Z0MH-FKHZ-GSMX-58M6

BarTender Licensing Wizard

### Activate New License or Find an Existing License

No licenses were found on your network.

To activate a new license, enter your product key code (PKC):

Z0MH - FKHZ - GSMX - 58M6

Or, click one of the following options:

Search for Existing License...

Search License on the Network...

Activation FAQ...

< Back Next > Cancel Help

5. Select BarTender licensing server and click "Next".

BarTender Licensing Wizard

### Select BarTender Licensing Server

The selected server will manage the activated license.

☒ Select a Licensing Server

DESKTOP-K... Refresh

☐ Specify a Licensing Server

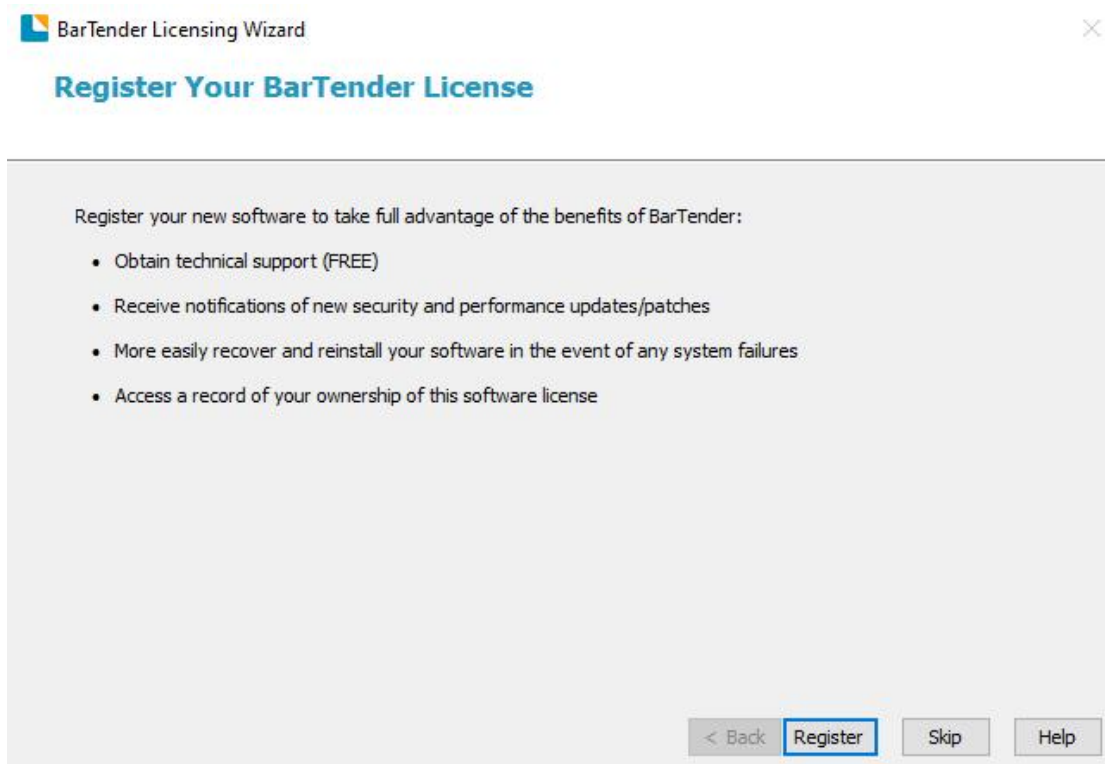

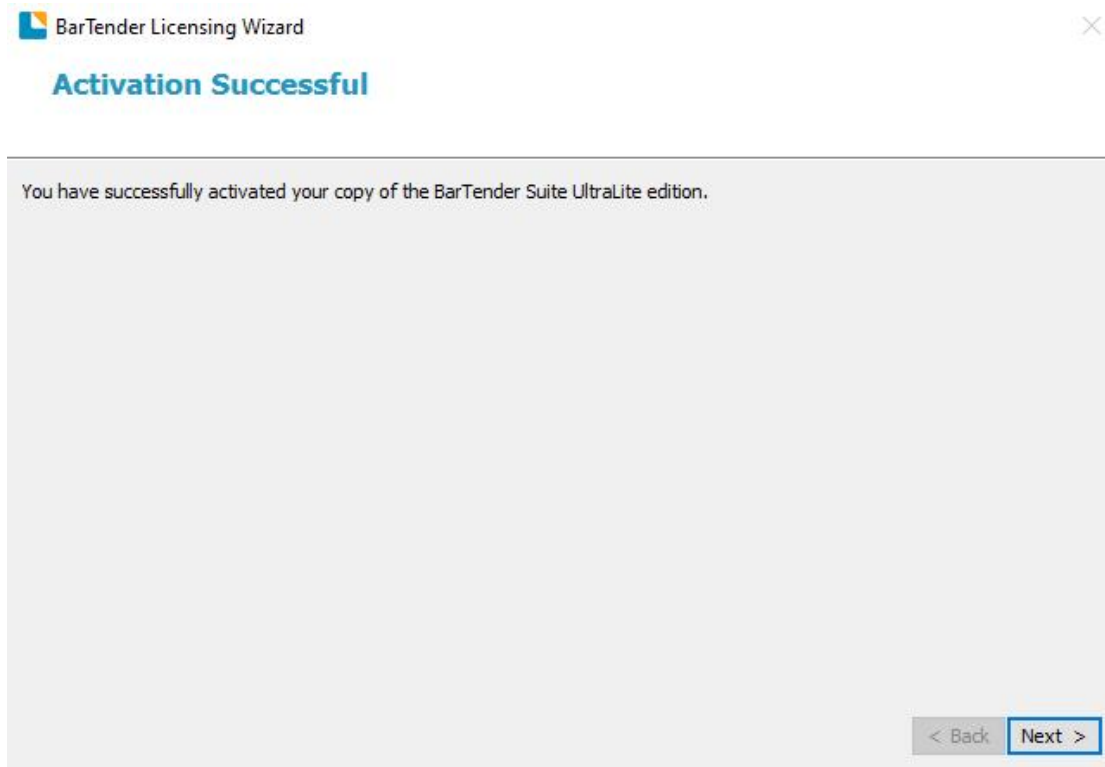

Server:

Example: MyServerName or 192.168.1.101

Port: 5160 Check...

< Back Next > Cancel Help

6. After successfully activate BarTender, register your BarTender license or skip.

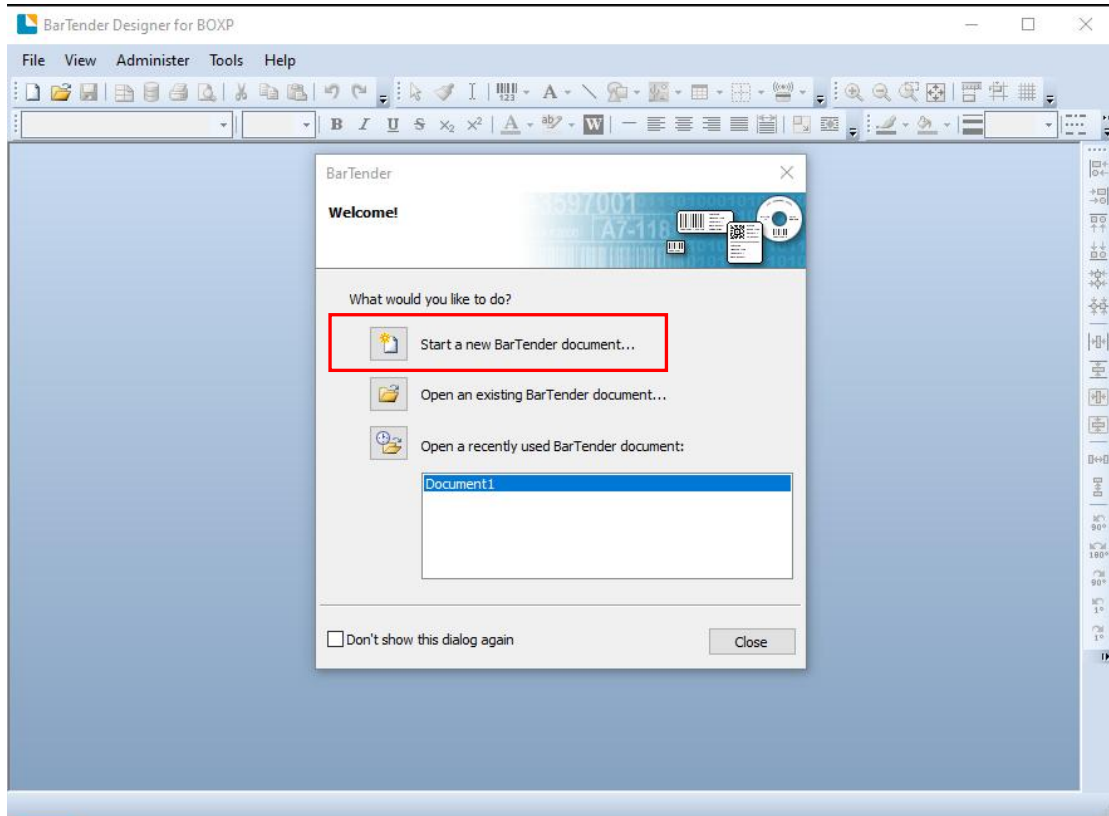

## 9.4 Usage

After the software is installed, you can edit the label.

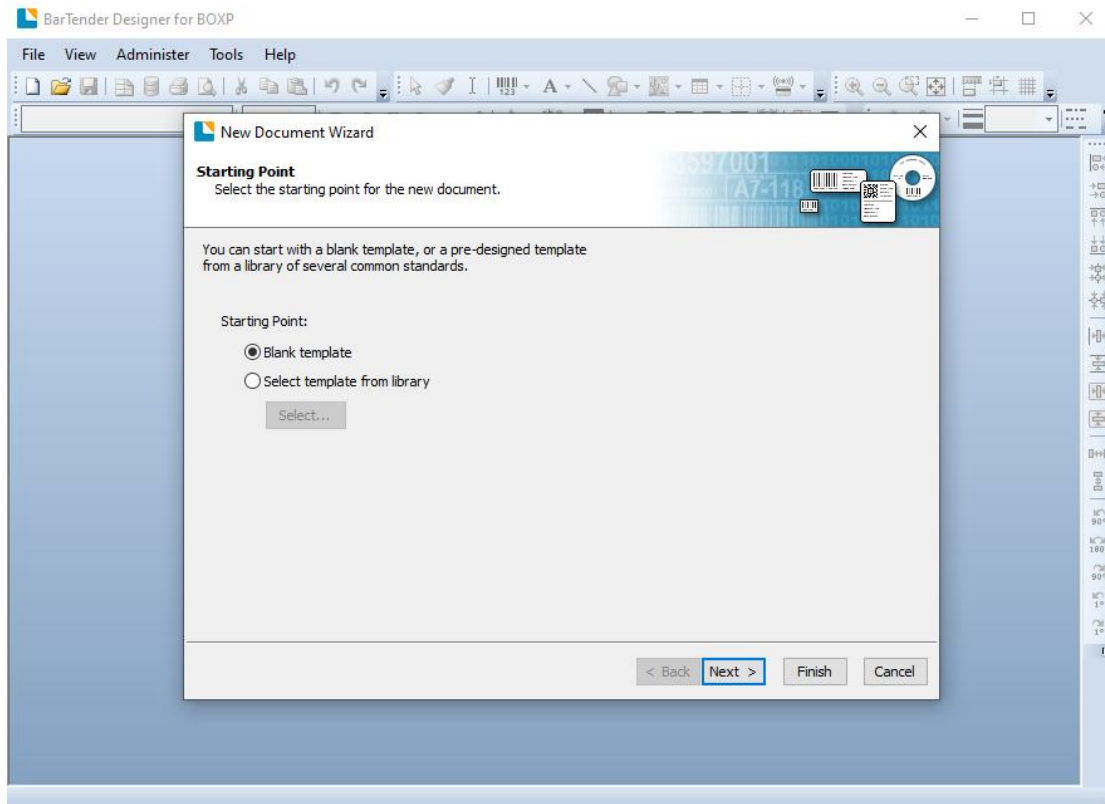

### 9.4.1 Page Settings

1. Run the BarTender software, click “Start a new BarTender document”.

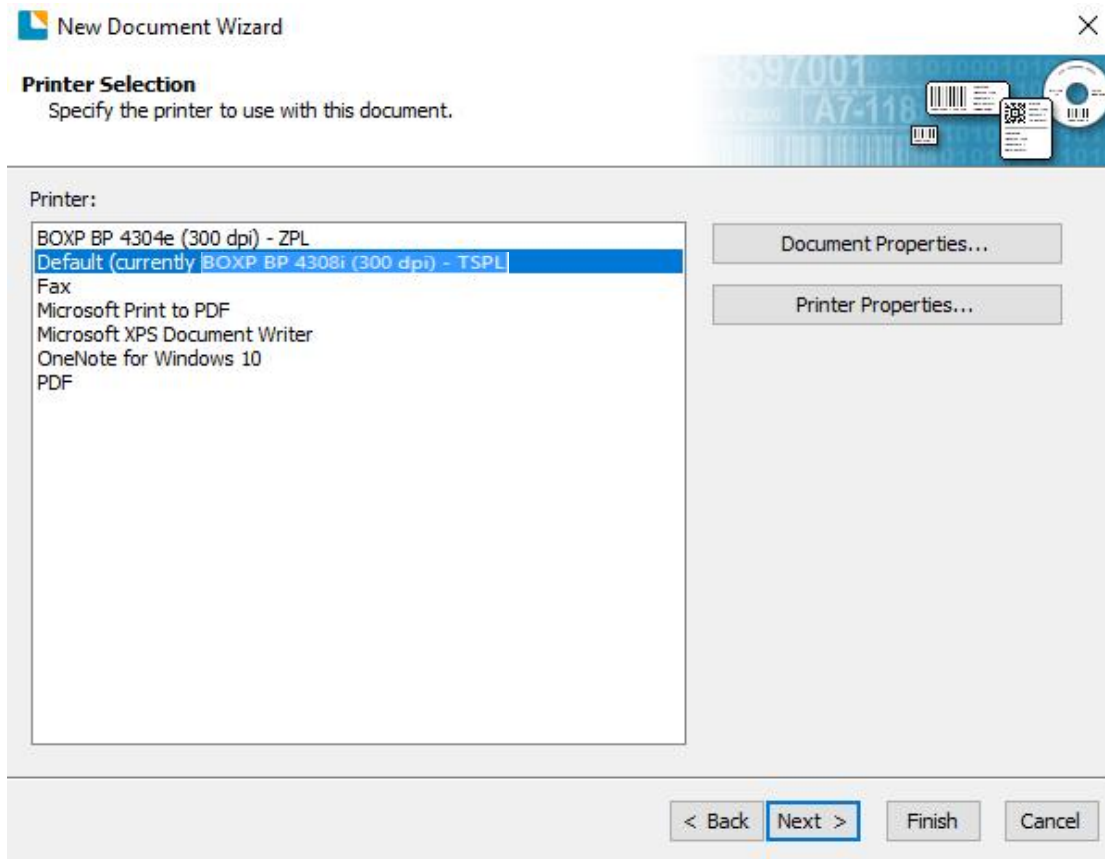

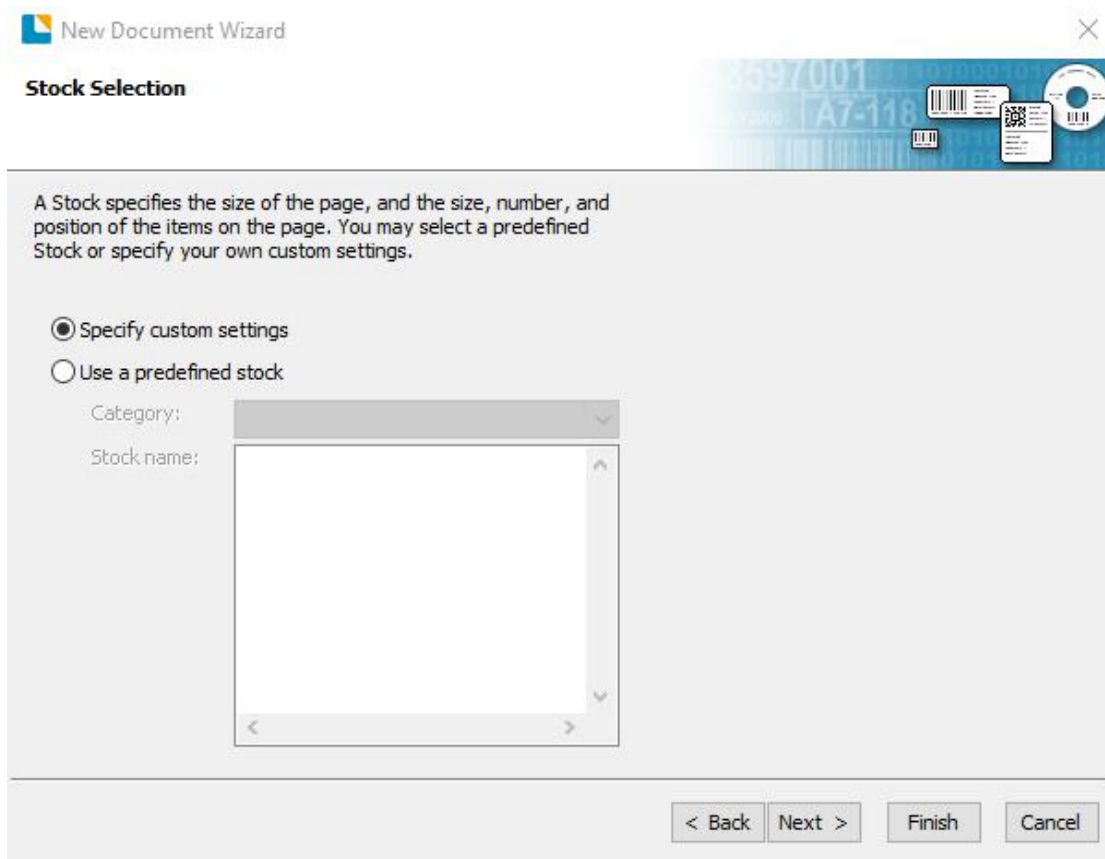

2. Choose “Blank Template”, then click “Next”.

3. Specify the printer to use.

- If the predefined stocks don't meet your need, tick "Specify custom Settings". Then click "Next".

**New Document Wizard**

**Stock Selection**

A Stock specifies the size of the page, and the size, number, and position of the items on the page. You may select a predefined Stock or specify your own custom settings.

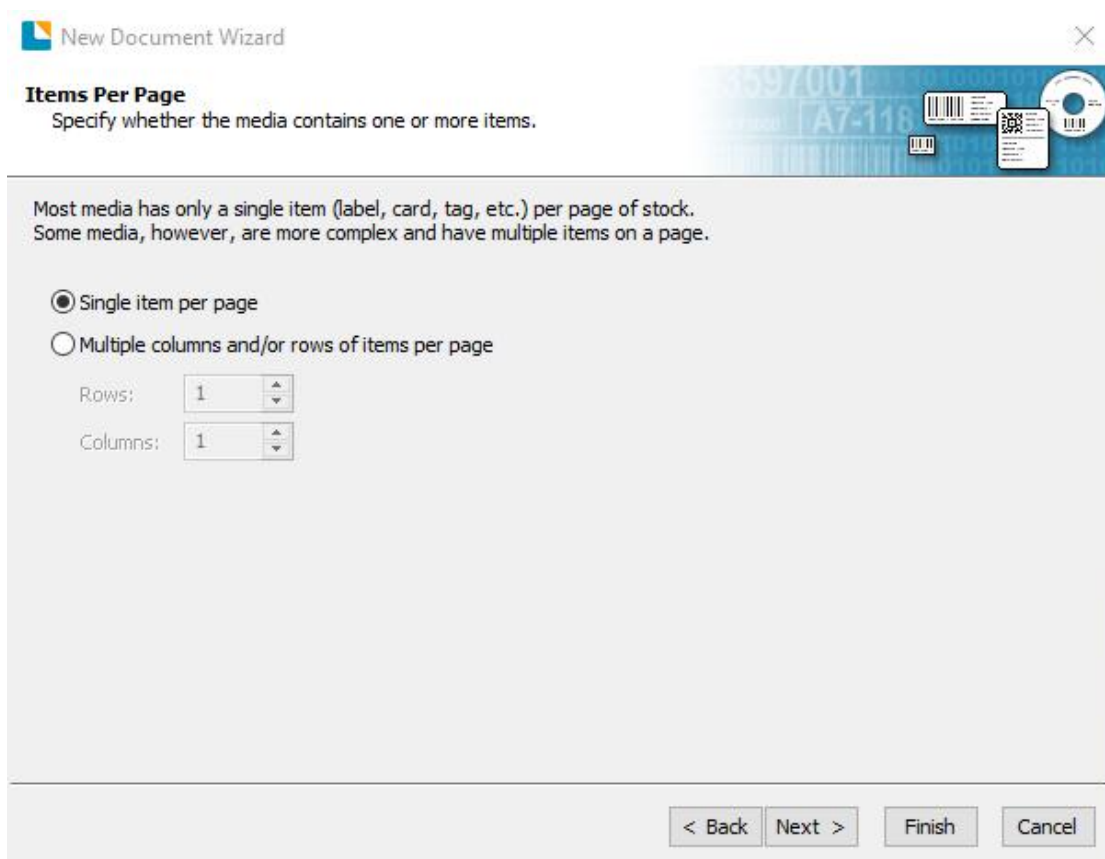

☒ Specify custom settings  
☐ Use a predefined stock

Category:

Stock name:

< Back   Next >   Finish   Cancel

- Tick "Single item per page", then click "Next". (If you print multiple labels, tick "Multiple columns and/or rows of items per page".)

**New Document Wizard**

**Items Per Page**

Specify whether the media contains one or more items.

Most media has only a single item (label, card, tag, etc.) per page of stock. Some media, however, are more complex and have multiple items on a page.

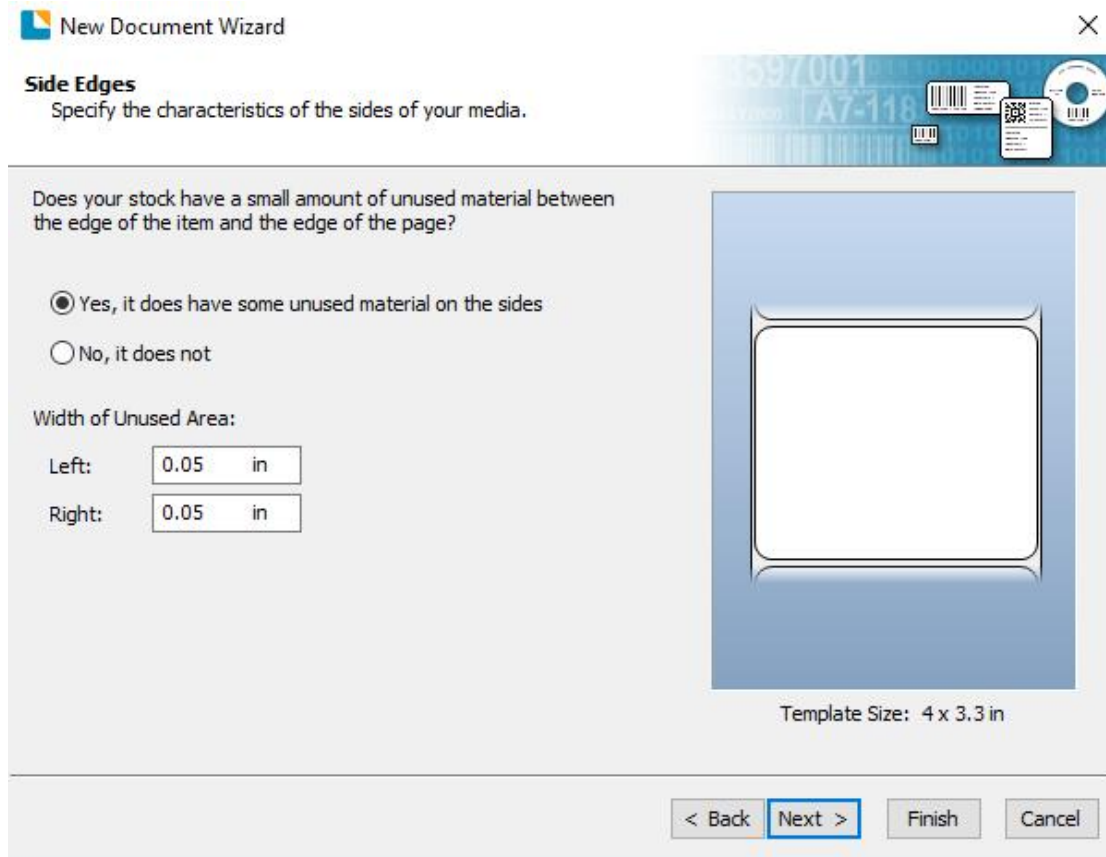

☒ Single item per page  
☐ Multiple columns and/or rows of items per page

Rows:

Columns:

< Back   Next >   Finish   Cancel

6. Edit the side edges, then click “Next”.

**New Document Wizard** [Close]

**Side Edges**  
Specify the characteristics of the sides of your media.

Does your stock have a small amount of unused material between the edge of the item and the edge of the page?

☒ Yes, it does have some unused material on the sides  
☐ No, it does not

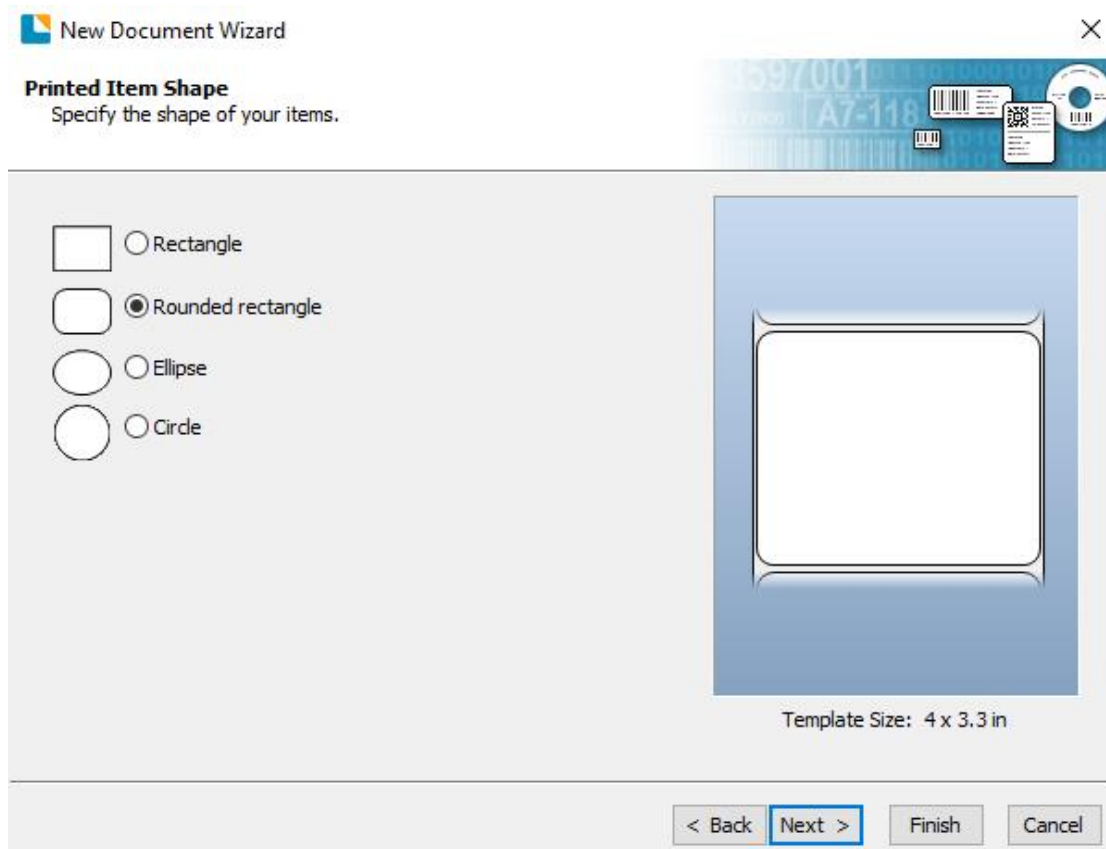

Width of Unused Area:

Left:  in  
 Right:  in

Template Size: 4 x 3.3 in

< Back **Next >** Finish Cancel

7. Choose the item shape, then click “Next”.

**New Document Wizard** [Close]

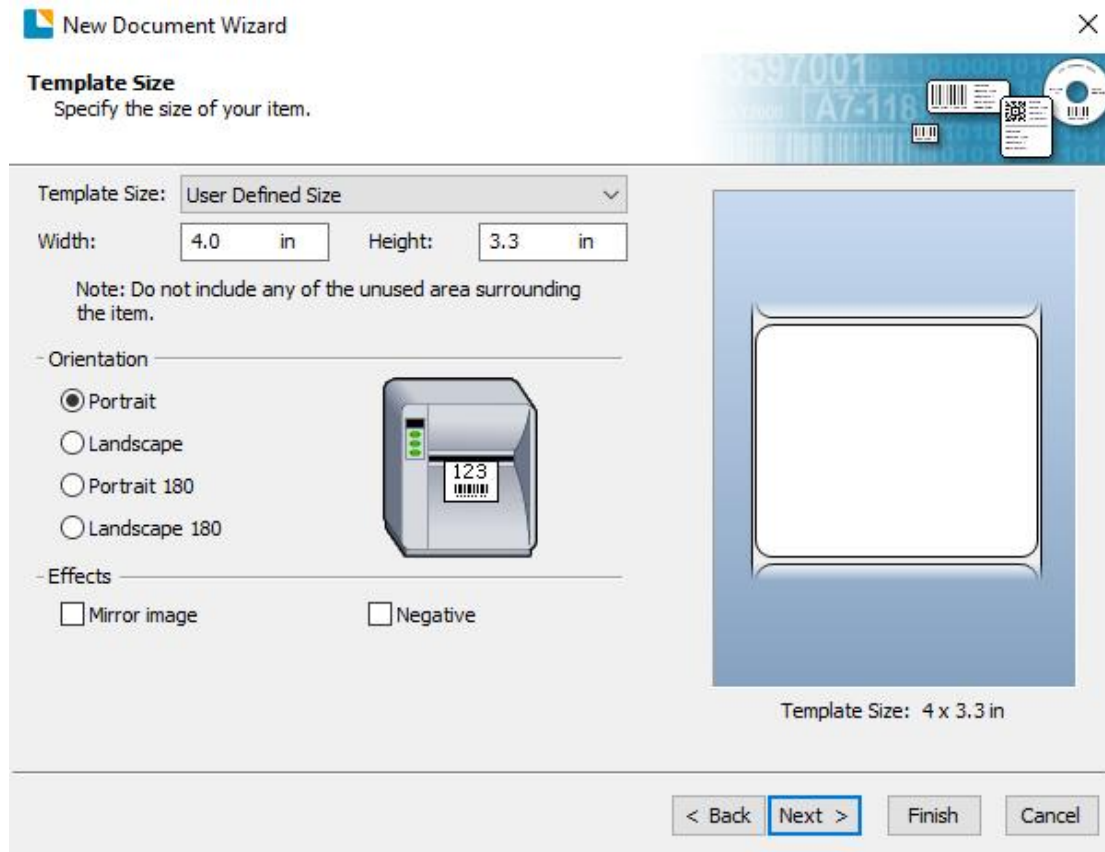

**Printed Item Shape**  
Specify the shape of your items.

☐ ☐ Rectangle  
☐ ☒ Rounded rectangle  
☐ ☐ Ellipse  
☐ ☐ Circle

Template Size: 4 x 3.3 in

< Back **Next >** Finish Cancel

8. Edit the template size, then click “Next”.

**New Document Wizard**

**Template Size**  
Specify the size of your item.

Template Size: User Defined Size

Width: 4.0 in Height: 3.3 in

Note: Do not include any of the unused area surrounding the item.

Orientation

- ☒ Portrait
- ☐ Landscape
- ☐ Portrait 180
- ☐ Landscape 180

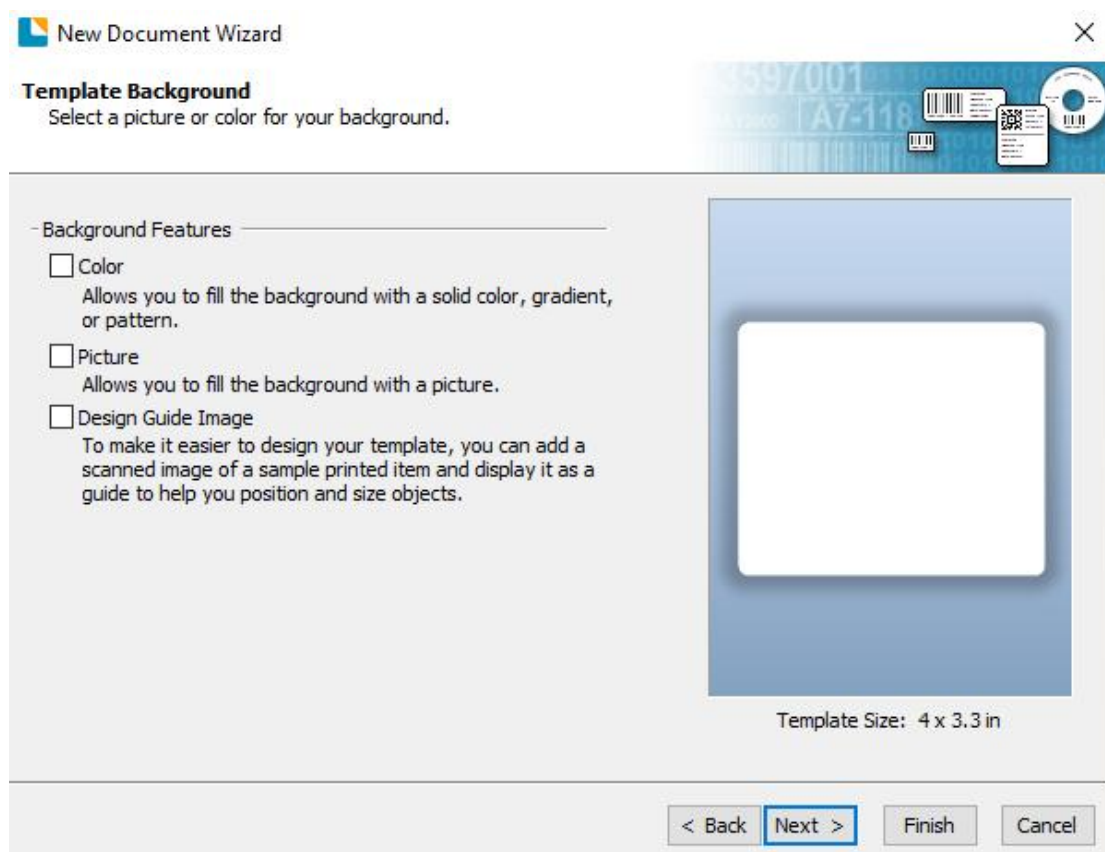

Effects

- ☐ Mirror image
- ☐ Negative

Template Size: 4 x 3.3 in

< Back Next > Finish Cancel

9. Based on your need, edit the template background. Then click “Next”.

**New Document Wizard**

**Template Background**  
Select a picture or color for your background.

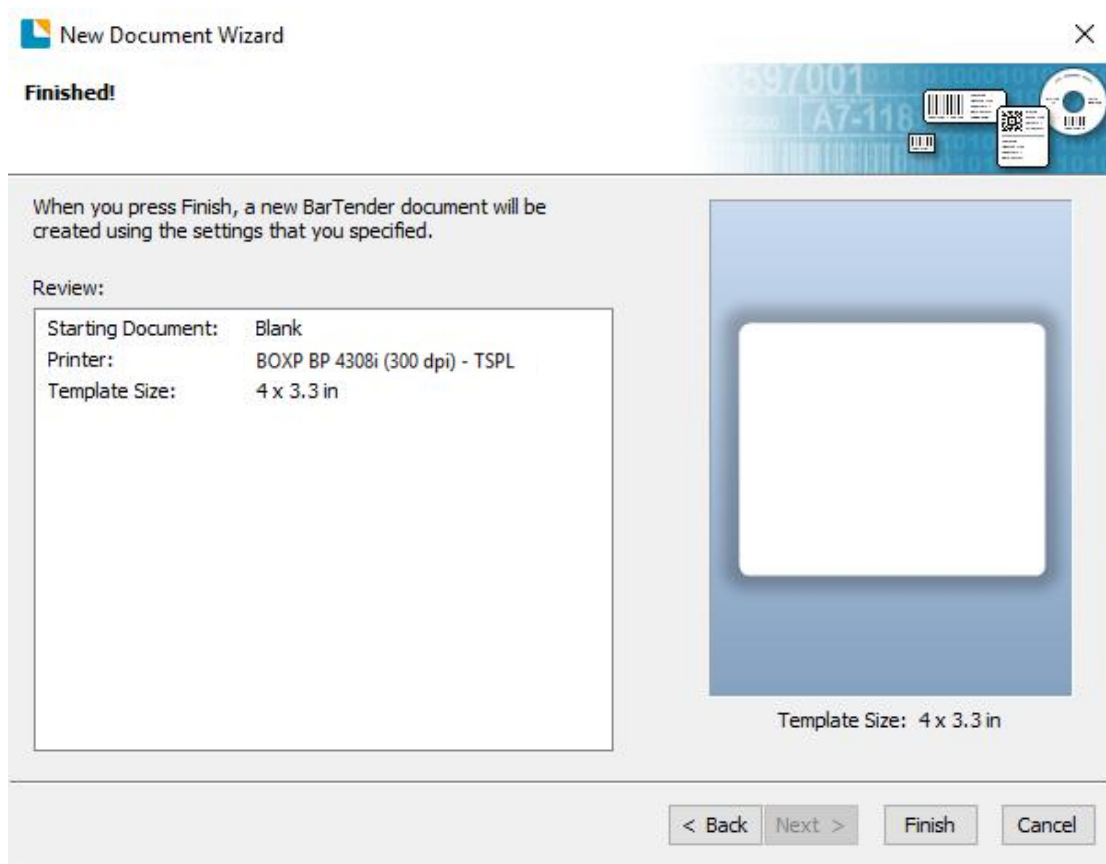

Background Features

- ☐ Color  
Allows you to fill the background with a solid color, gradient, or pattern.
- ☐ Picture  
Allows you to fill the background with a picture.
- ☐ Design Guide Image  
To make it easier to design your template, you can add a scanned image of a sample printed item and display it as a guide to help you position and size objects.

Template Size: 4 x 3.3 in

< Back Next > Finish Cancel

10. Finish the settings, showed in the “Review” and “Preview”. Then click “Finish”.

## 9.4.2 Label Edit

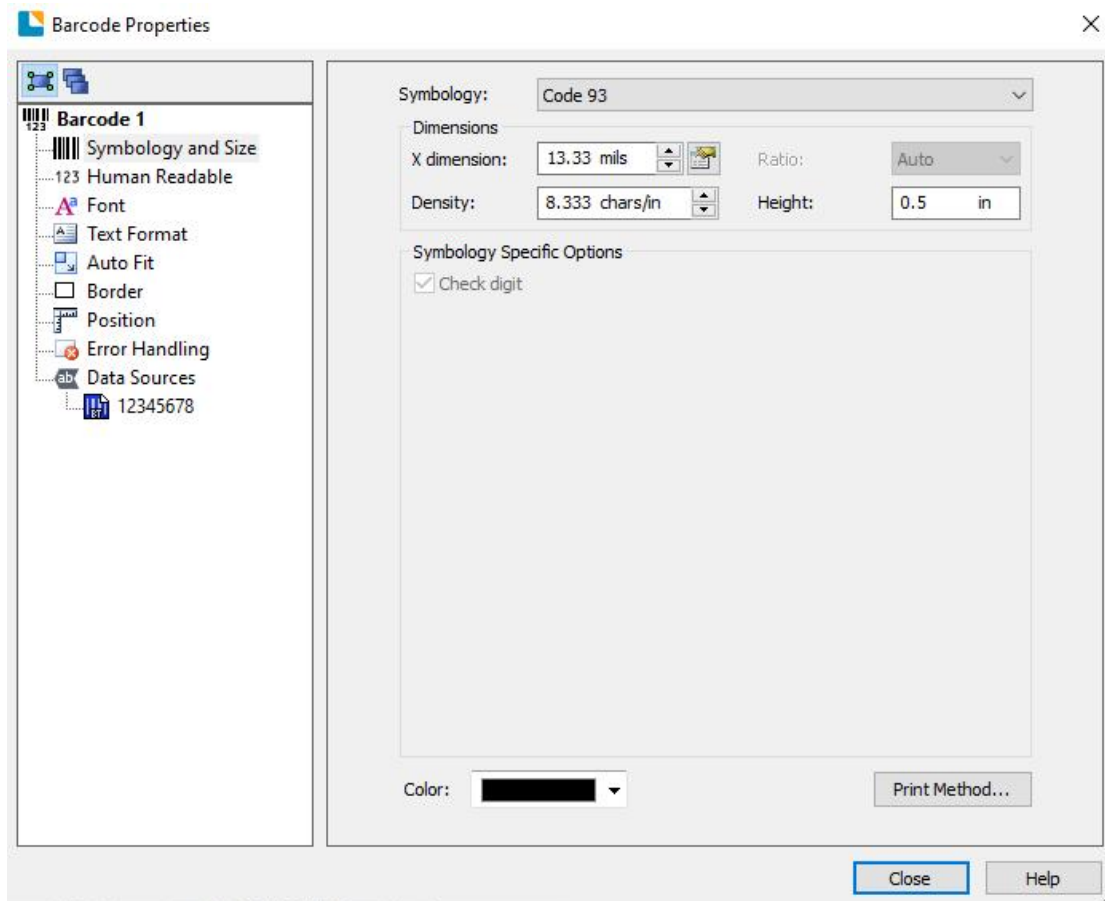

1. Click the icon of code .
2. Choose the code, then click “Select”.

- Click the blank, showing the code.

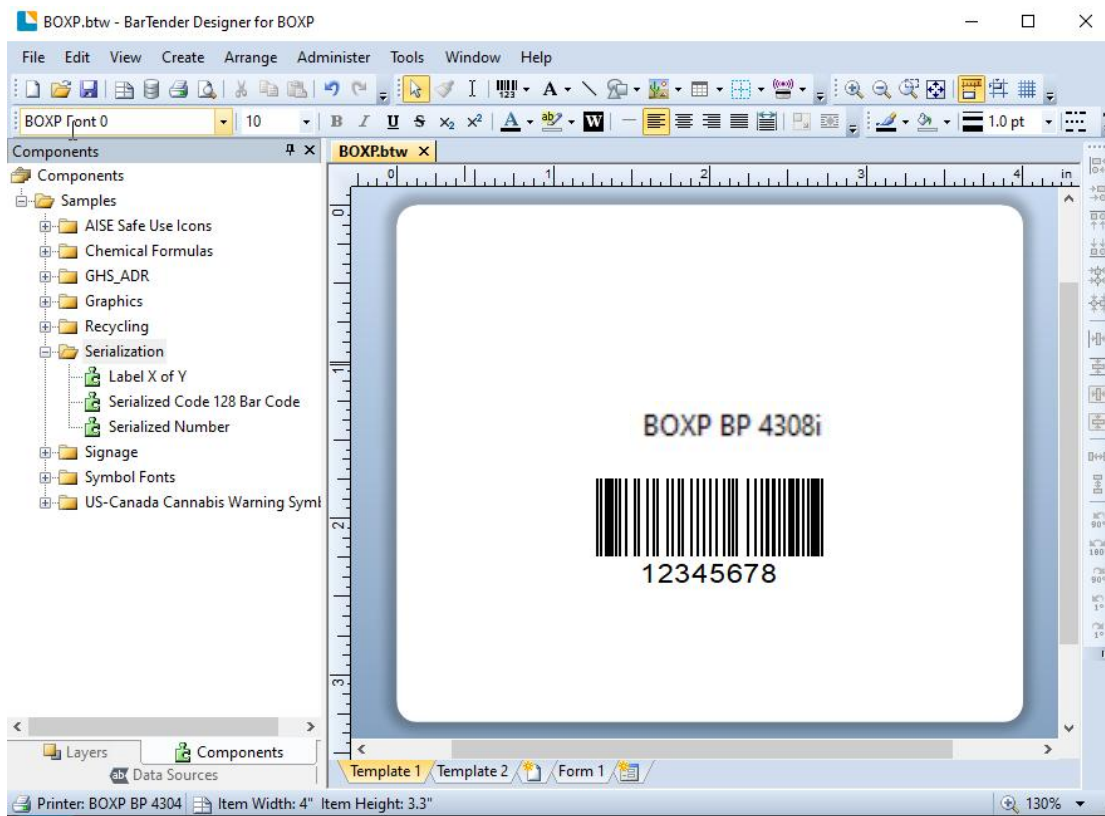

- Double click the code and edit it. User can set up the size, font, border and so on.

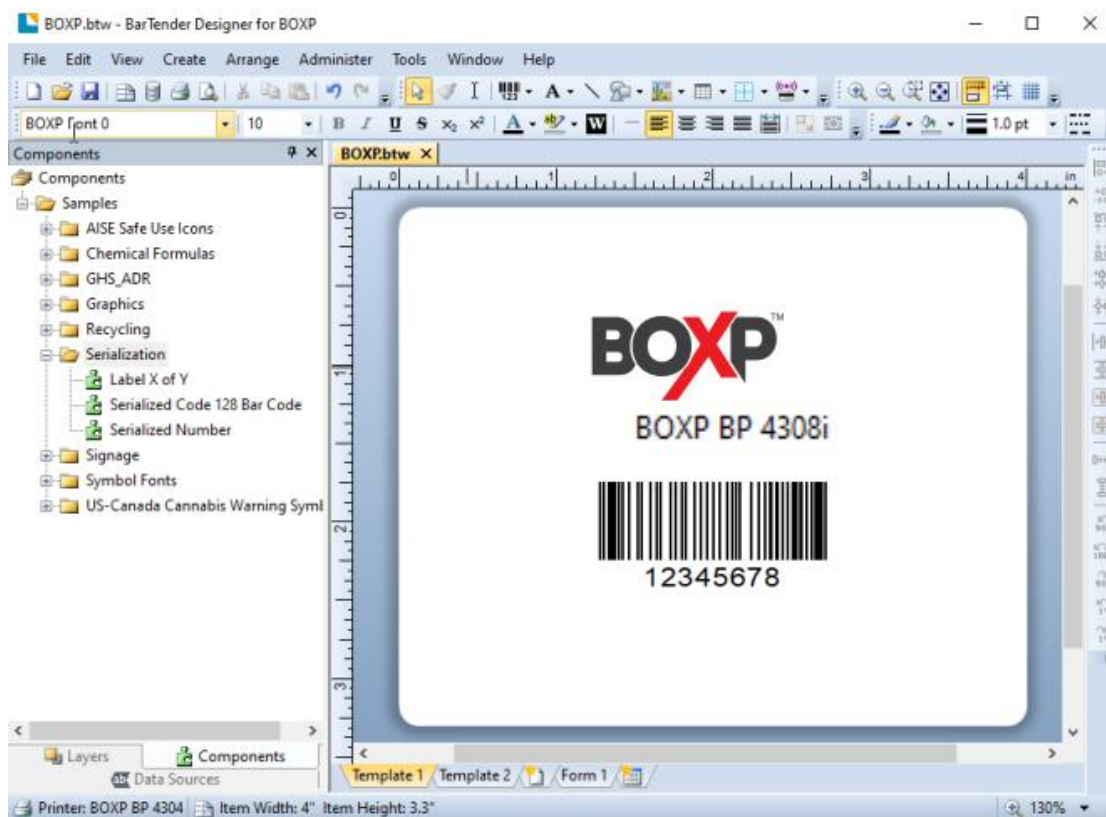

After completing the settings, click "Close".

5. Click the icon of character , then enter the text.
6. Left click on the blank page, enter the desired text, and set the text format in the status bar.

7. Click the icon of picture , then edit the pictures. Left click on the blank page to display the inserted image.

## 8. Adjust the image size through borders.

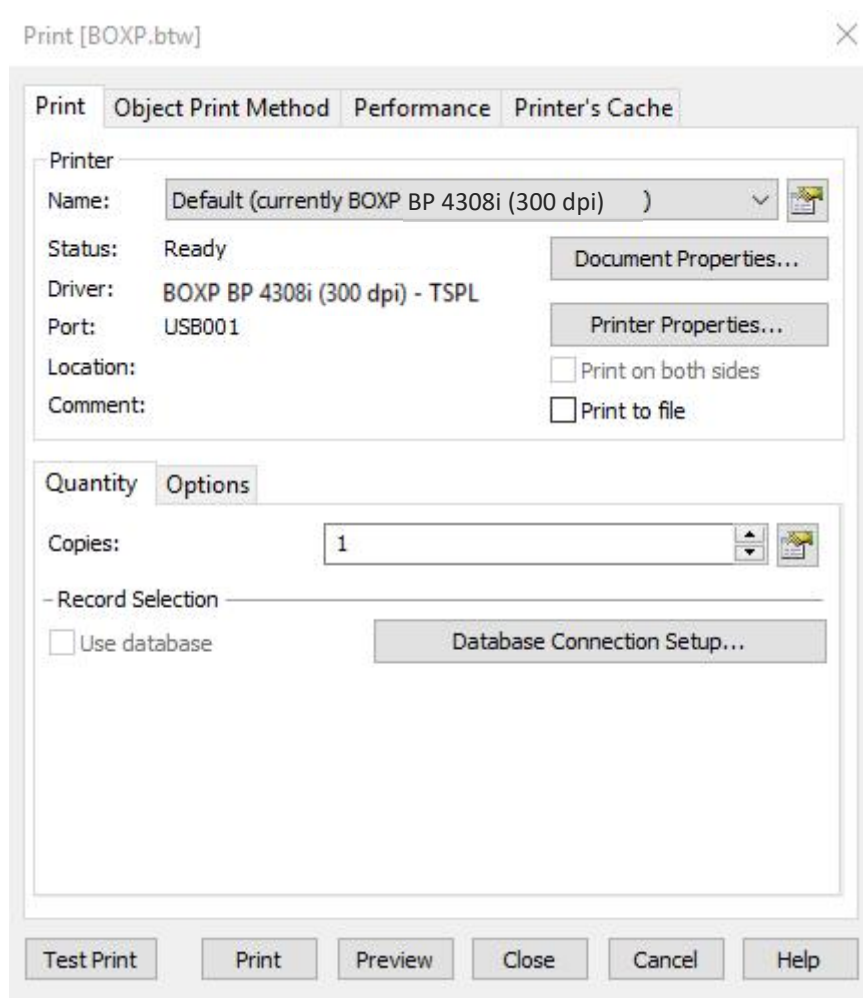

9. Move the object and typeset the edited label.

10. Finish all the settings. Click “Print” and a new label will be printed.

## Appendix I Display Menu

Main Menu	Submenu	Parameter	Remark
Startup Interface	/

--	-----------	--	------------

## Appendix II Warning Message

Icon	Description
No Form Found	Form is not found. Check if the files are exactly stored in the memory device
No Image Found	Image is not Found. Check if the image is exactly stored in the memory device
No Fonts Found	Fonts is not found. Check if the font is exactly stored in the memory device
No F/W found	Firmware files are not stored in the USB storage when updating the firmware
No Battery Found	Battery is not installed in the printer when setting time and date. Check if the battery power runs out or not installed well
Password Error	Wrong password is entered. Enter the correct password to modify the protected parameters.
USB storage Lock	Printer cannot write the data to the USB storage. Unlock the USB storage
No USB storage found	There is no USB storage installed in printer when updating the printer. Check if the USB storage is well inserted in printer.
No Cutter Found	Cutter is not installed on printer when execute the cutter test
Ethernet Error	Ethernet port is disconnecting.
Flash ROM Full	Internal flash ROM is full. Delete un-necessary files to store the current files.
Found No Bluetooth	There is no Bluetooth module installed in the printer.
Found No WiFi	There is no WiFi module installed in the printer.
Material too thick	Material is too thick or hard, cutter takes longer time to return the blade to the initial position after cut.

## Appendix III Printer Status

Icon	Status Description
Ready	Printer is idle.
Printing	Printer is printing something.
Feeding	Feeding the Label.
Cancel Job	Cancel the current printing job.
Pause Printing	Pause the current printing job.
Wait label taken	Wait to peel the printed label to print the next label.
Wait on Demand	Wait to press the feed button to print the next label.
Saved	Save the change of parameters to printer.
Dump Data printing	Catch the data from communication port and send to printer to print out.
Media Calibration	Press the Feed button to calibrate the label.
Receiving Data	As soon as all of the data has been received, the printer will automatically resume operation.
Refresh Firmware	Printer is writing the new firmware codes to the Flash memory.
Reboot firmware	Restart printer.
Formatting USB mass storage	Printer is creating the needed folders and control files to the USB mass storage.
